

Sending Output and Output control

Research Service

Selecting and Sending output

1. Researcher starts small web-application (shown in live demo Tuesday)
2. Researchers selects the files to send home
3. Application checks
 - Is the researcher allowed to have output sent home
 - Are the selected filetypes allowed
 - Is the size within limits (currently 5MB)
4. If answer yes to every of the above questions files are sent.
 - This is where the new (in operation Q3-2016) check will occur with automatic scanning and possible warning

Output -control

- All files above a certain size is manually controlled
- 10% (rounded up) of the remaining files in each of the categories are manually checked
- Each category is assigned to a specific staff member so not every staff member needs to know every program needed.

Allowed file types and grouping
