- N₂O
- As of 2008: HFC's, PFC's, SF₆
- (NO_x, CO, NMVOC, SO₂)

- The 1996, 2000 GHG inventories were calculated by the MoEP
- From 2005 and on the CBS calculates the inventory annually (2003-2011 inventories)

Challenges

- ◉ Fuel Consumption:
 - ◉ Only the distribution in the Manufacturing sector is Known
 - ◉ the other sectors distribution is unknown
- ◉ Greenhouse Gases, distribution UnKnown:
 - ◉ F-gases (HFCs, PFCs)
 - ◉ waste & wastewater treatment
- ◉ Other Emissions (not from fuel combustion)-
need further development

Updates in progress

- Examination of the coverage of the data collected and reported to MoEP in the PRTR
- Updating emission factors of air pollutants from vehicles - MoEP and ICBS
- Processing and analyzing the distribution of air emissions by sector, from the 2012 survey
