

# On-line system Research Services new system for ordering data to research projects

Research Services

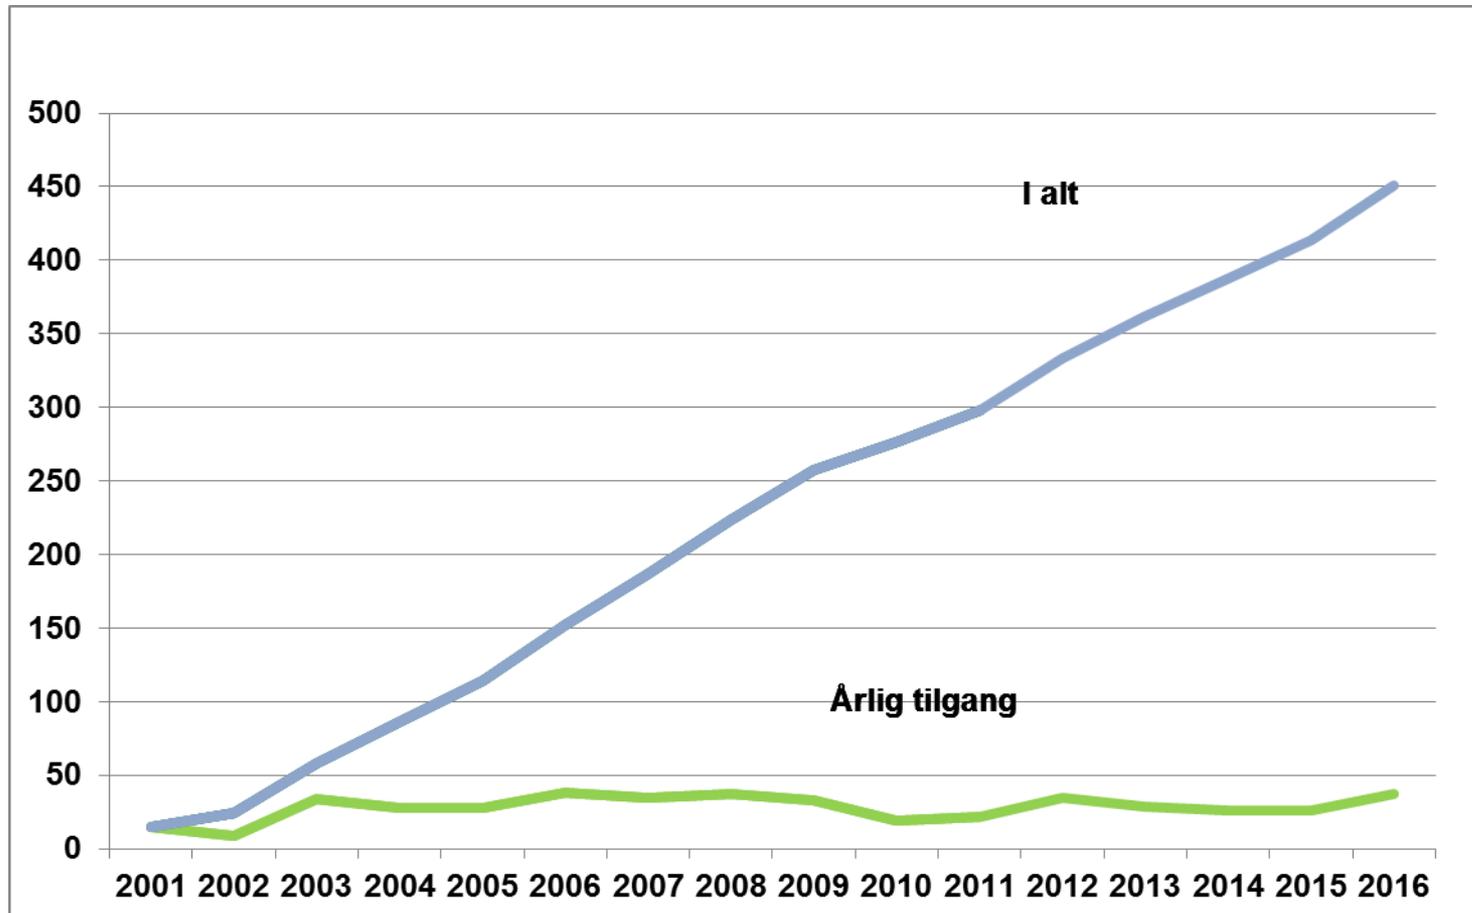

# The background

- Researchers can't today in an easy and standardized way order data for research projects
- Information available on FSE's website but have different locations
- E.g. is variable descriptions, documentation, project template is not on the same page
- Need a page that gathers it all information
- Benefits both researchers and employees to have information on a dedicated page
- Give us detailed knowledge of what data the researchers order
- Large increase in customers, projects and researchers makes a standardized system necessary to handle further growth

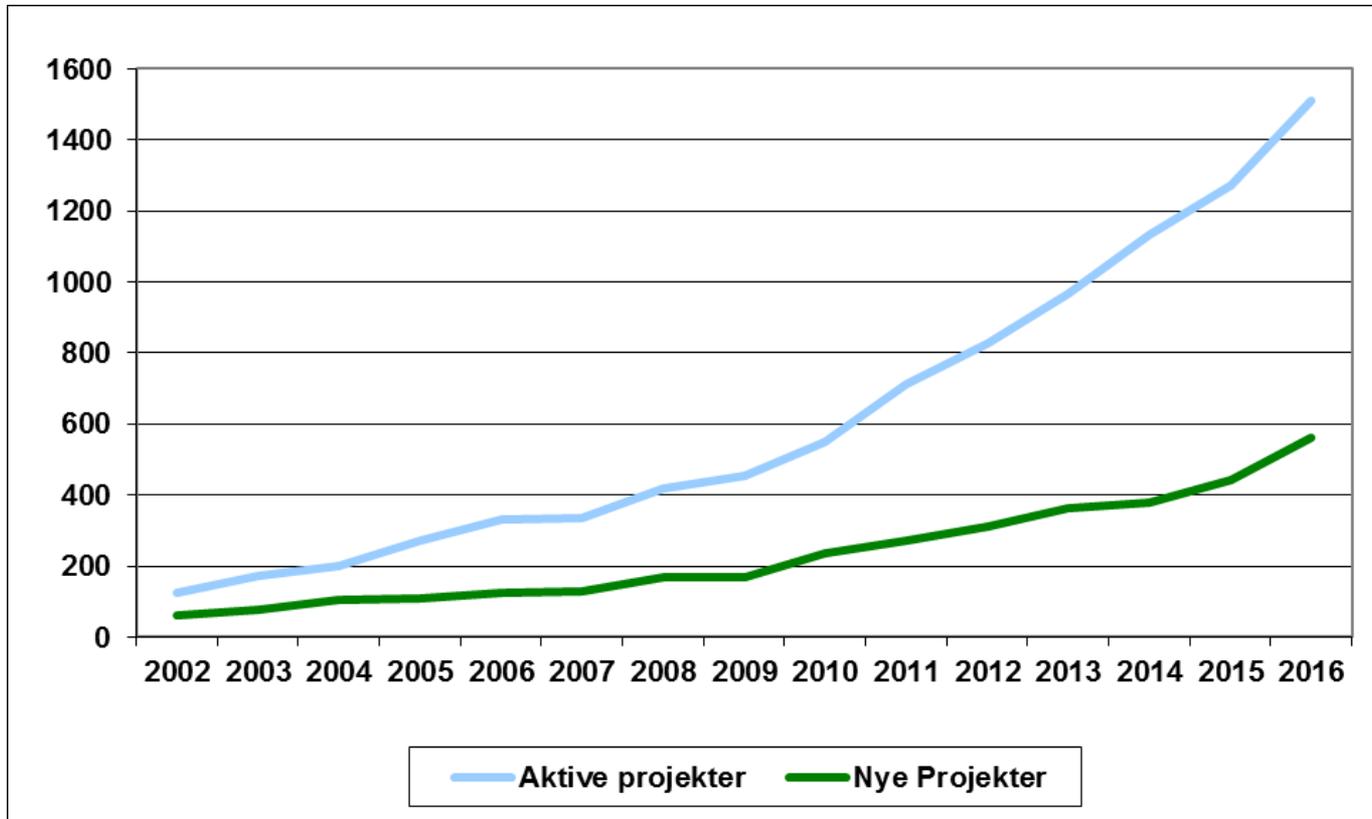

# The background

## Increase in Customers (the authorized institutions)

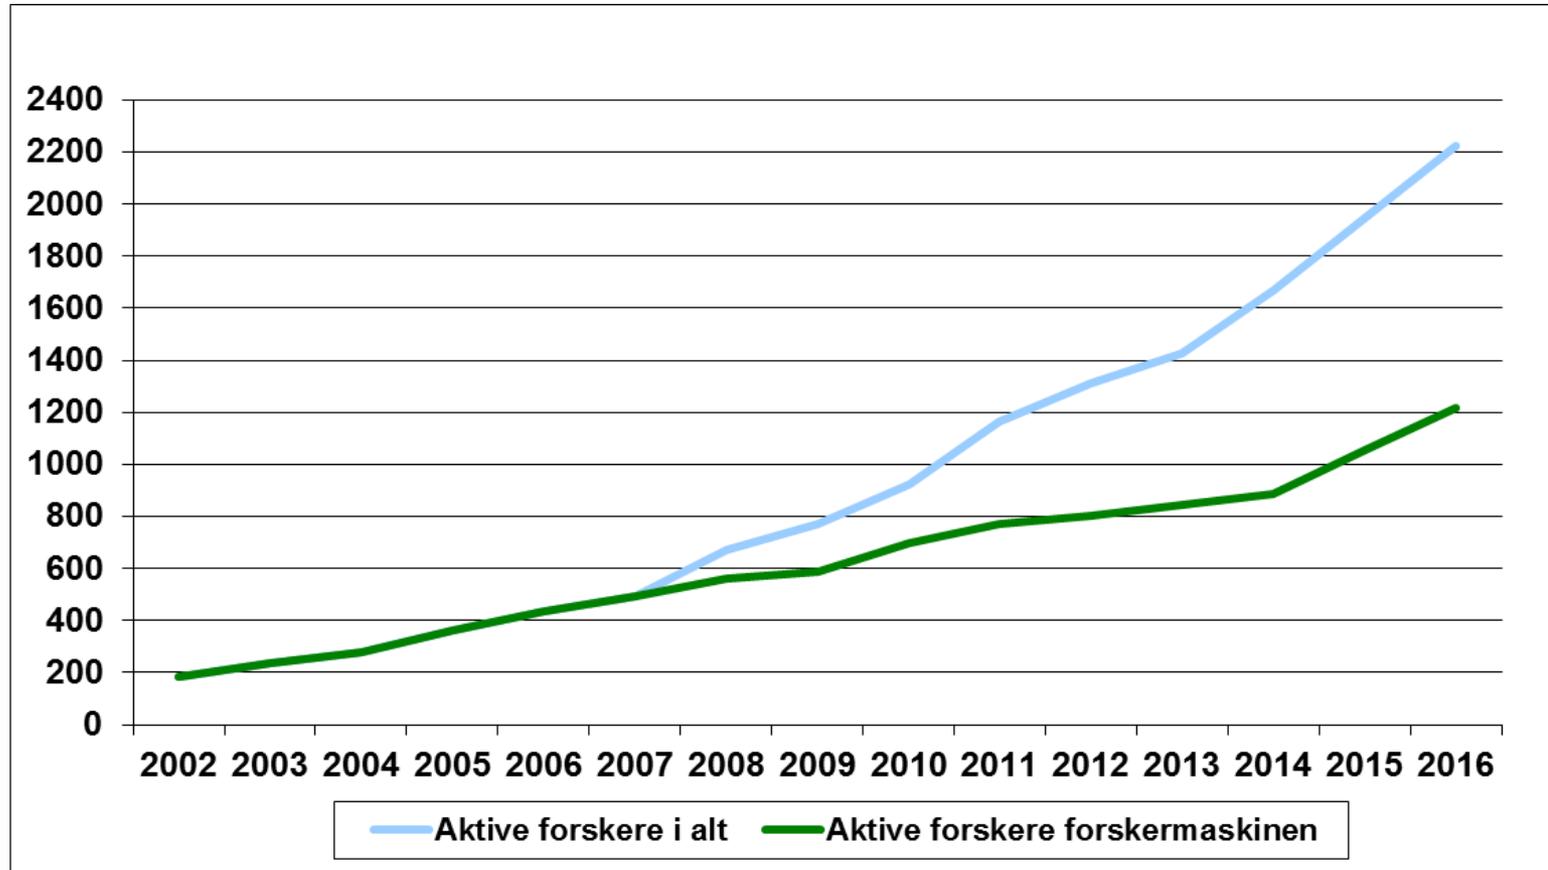

# The background

## Increase in projects

# The background

## Increase in researchers

# Three subprojects

- **Administration System FSE-SYS**

- Keep track of all our customers – replaces spreadsheets!
- Ensures uniform procedure by the administration of institutions, projects and researchers - for example, fixed rules for researcher accesses
- Make it easier to get an overview - who has access to what?
- Is implemented

- **Metadatasystem FSE-META**

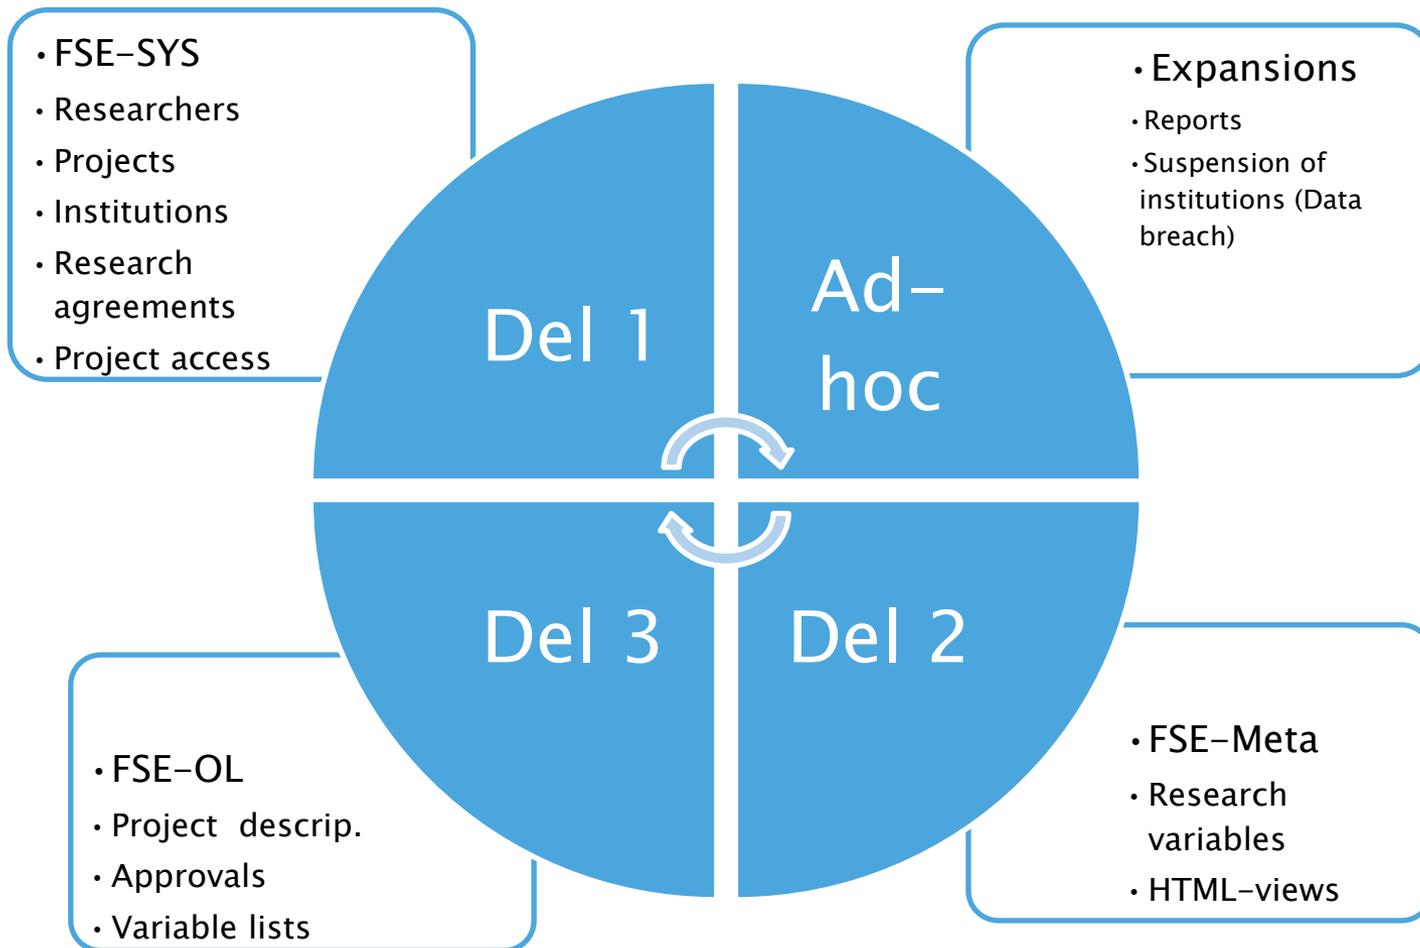

- Researchers must be able to select the variables they need in a project. FSE-META creates a database with the variables that researchers can order
- Under implementation

- **Ordering System - FSE Online**

- Gather all relevant information for ordering data for a project on a website - depending on FSESYS - only known researchers can order and FSEMETA - so they can choose the right variables
- Planning stage

## 2 - Det Nationale Forskningscenter for Velfærd (SFI)

**Institutionsnummer** 2  
**Institutionsnavn** Det Nationale Forskningscenter for Velfærd (SFI)  
**FSE navn** SFI  
**Finansieringsmodel** O  
**Kategori** F  
**Kommentar**  
**Oprettet dato** 26-03-2001  
**Godkendt dato** 26-03-2001  
**Ophørt dato**  
**Sidst opdateret** 26-03-2001 00:00:00
