

The background features abstract, overlapping green geometric shapes, primarily triangles and polygons, in various shades of green, creating a modern and dynamic visual effect.

# Concerns by the Researchers

Meeting with NSSRA 2 March 2016

# Summary of discussions

- ▶ Sources and statistics: more disaggregated statistics needed on the web site e.g *regional*, age. NSSRA is preferred source. E.g, energy balance on sector and industry
- ▶ Source for statistics: Webpage and expert contact ( and regional offices)
- ▶ Methodology and documentation: quality declarations not known, more information on regional level

- ▶ Individual data access: well aware of that. But disaggregate and flexible data anonymized data is a wish.
- ▶ Cooperation works in general fine, while reporting to NSSR is not streamlined The same indicators is reported to several reports.
- ▶ Search functionality: good, Google is also used
- ▶ Errors in statistics: Never happens !
- ▶ Trust: In general Yes. Other sources may be in conflict with NSSRA.

# Further cooperation possibilities

- ▶ Teaching activities: the web site is important. NSSRA could cooperate and agitate for more teaching ressources in the use of statistics
- ▶ NSSRA is very *open* for cooperation and students are heavy users of armstatbank
- ▶ Seminars, training, workshops: YES! Including the students
- ▶ Improvement needs: Quality of data, reporting format should be updated in cooperation with respondents
- ▶ Armstat sources used; 50 pct know Armstatbank, but less use : Marketing need
- ▶ Release calendar is not so well known: Marketing need
