**Harmonization, Standardization
and Mapping of processes and
activities in ICBS**

Sigalit Mazeh

It's All in the Numbers

- Harmonization and standardization
- Mapping of processes and activities

Harmonization and standardization

- **Overview of the work done**
 - Using standardized terms and classifications in our publication
 - Glossary
 - meta data (subject and sub subject in the web site)
 - Questions in Questionnaires
- **External and internal parties involved**
 - The Management
 - Yearbook and Publications Committee
 - Steering and Implementation Committee for the metadata
 - Dissemination Unit
 - Subjects units

Harmonization and standardization

- **Tools used**
 - Responsible for Harmonization and standardization
 - Technological tools for the glossary (the glossary is in the website)
 - Technological tool to insert any metadata that exists on the subject and sub subjects in a uniform and standardized way, by using the SIMS standard
 - There is no technologic tool for the Questions in Questionnaires.
- **Next steps already planned**
 - Expansion of the Variables' dictionary and Implementing its use in CBS
 - Expansion of the glossary and coordination between same terms in different subjects.
 - Use the SIMS standard to enter all the metadata to one system in a standard way.
 - Use SIMS standard to create Quality Declarations in the web site.

Harmonization and standardization

- Vision for the future
 - Full documentation of all work processes, and outcomes in a technologic tool in uniform and standard way for internal and external users.
 - Full metadata in the web site
- Main expected challenges
 - Technological tools that cover all the needs and can link between the different aspects.
 - Cooperation with all the units in the process in order to create a standard built-in workflows

Mapping of processes and activities in ICBS

- **Overview of the work done**

- Mapping all the Committees in ICBS and the Committees operating under the Public Council for Statistics
- Mapping all the Surveys conducted in ICBS in the survey units and in the subjects units
- Mapping the administrative files
- International Questionnaires

- **External and internal parties involved**

- The Management
- Subjects and survey units
- Chairman of the Public Council for Statistics
- International Relations and Statistical Coordination department

Mapping of processes and activities in ICBS

- **Tools used**
 - Excel, word....(Without technological tools)
- **Next steps already planned**
 - Expansion of the mapping
 - Mapping all the NSS partners and NSS statistics survey, administrative file and products.
- **Vision for the future**
 - Mapping all the activity, processing and products that we have in ICBS and in the NSS.

Questions?

Thank you!
