

## HLPF – July 2019

### Goal 13: Climate action

-  **13.1.1. Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population**  
Statistics are not compiled in this area, but it is estimated that it occurs very rarely or never.
-  **13.1.2. Number of countries that adopt and implement national disaster risk reduction strategies in line with the Sendai Framework for Disaster Risk Reduction 2015–2030**  
Denmark has national disaster plans and the Danish municipalities are responsible for preparing local disaster plans.
-  **13.2.1. Number of countries that have communicated the establishment or operationalization of an integrated policy/strategy/plan which increases their ability to adapt to the adverse impacts of climate change, and foster climate resilience and low greenhouse gas emissions development in a manner that does not threaten food production (including a national adaptation plan, nationally determined contribution, national communication, biennial update report or other)**  
It is in Denmark both a national, regional and municipal responsibility to develop strategies for adapting to climate change, etc.
-  **13.3.1. Number of countries that have integrated mitigation, adaptation, impact reduction and early warning into primary, secondary and tertiary curricula**  
Counteract lack of literacy is an integral part of the national education policy.
-  **13.3.2. Number of countries that have communicated the strengthening of institutional, systemic and individual capacity-building to implement adaptation, mitigation and technology transfer, and development actions**  
Strengthening of institutional, systemic and individual capacity-building to implement adaptation, mitigation and technology transfer is part of several policy areas in Denmark.
-  **13.b.1. Number of least developed countries and small island developing States that are receiving specialized support, and amount of support, including finance, technology and capacity-building, for mechanisms for raising capacities for effective climate change-related planning and management, including focusing on women, youth and local and marginalized communities**  
This indicator is not relevant to Denmark because of the geography.
