Connection to Researcher servers at DST – Mac users

This guide describes how to connect to our Researcher servers at Statistics Denmark – for Mac users, via https://remote.dst.dk

Before connecting you need to install "Microsoft Remote Desktop" from the App Store.

- Go to the App Store and search for "Microsoft Remote Desktop"
- Select the application and install

Connection to Researcher servers

You are now ready to connect to a Researcher server.

- Start Safari (Firefox or Chrome is also supported, however, with slightly changed dialogues/windows)
- Enter the address https://remote.dst.dk
The following image appears in the browser:

- Enter your Researcher username (3 or 4 characters) under Username
- Enter your 4-digit PIN code under Password
- Then click Logon

After that, the following appears:

After a few seconds, you will receive an SMS with a one-time password

- Enter your one-time password
- Then click Logon
If you are equipped with a token, you do not receive an SMS. Instead, you have to enter the 8-digit number, which your Entrust token shows as your one-time password.

The number will appear after a few seconds when you hold down the "BUTTON" on your token.

The following image will appear in the browser:
(Note that the number of icons you have, depends on which rights you have)

- Click the server you want to connect to
• Click Allow (Tillad)

• Enter your project username for the server in the "User name" field (e.g. dstfse\flge9999)
• Enter your password for the server

The following message appears, the first time you log on to the server:

• Click Show Certificate
• Tick the box **Always trust ... when connecting to ...**
• Click **Continue**

• Enter the username and password for your Mac
Now you are connecting to your server at Statistics Denmark.

Then your *Desktop* appears, and you can now operate your server.

![Welcome Screen](image1)

After you finish your work on the server, you must log out.

Afterwards, click Logout at the top left corner of the Browser:
