

**Documentation of statistics for
Names 2017 Month 01**

1 Introduction

The statistics concern the names of newborn babies and the whole population in Denmark at 1st January by first name and surname.

The statistics were established in 1995, at first undertaken as a project for the Department of Name Research at Copenhagen University. The statistics were first published in 1995 and were based on the population of newborn children in 1993.

Today, data concerning names are published biannually. In January lists concerning the whole population are published and in July lists concerning the newborn babies the previous year are published.

2 Statistical presentation

The statistics concerning names are split up into two different statistics. One concerns the whole population in Denmark at 1st January by first name and surname. The other concerns names of newborn babies.

The statistics are based on the first name. Hyphenated first names are considered as one name. Names, which can be spelt in several different ways, are included with the most popular spelling in the given year.

2.1 Data description

The statistics concerning names are split up into two different statistics. One concerns the whole population in Denmark at 1st January by first name and surname. The other concerns names of newborn babies.

The statistics are based on the first name. Hyphenated first names are considered as one name. Names, which can be spelt in several different ways, are included with the most popular spelling in the given year.

The basis for the statistics is data from the Central Population Register (CPR).

2.2 Classification system

Not relevant for these statistics.

2.3 Sector coverage

Not relevant for these statistics.

2.4 Statistical concepts and definitions

Surname: The surname used in the statistic is the surname written in the Central Population Register.

First name: The first name in use in the statistic, is the first first name written in the Central Population Register. If there is a hyphen between two first names, the names are considered as one first name.

2.5 Statistical unit

The statistical unit is people.

2.6 Statistical population

The number of children born in a given year. In the statistics concerning names the newborn babies must be resident in Denmark at 1st July of the previous year in order to be covered by the statistics.

2.7 Reference area

Denmark.

2.8 Time coverage

The statistics concerning first names of newborn babies date back to 1985. 30th June is the time of reference for the statistics concerning first names for newborn babies.

The statistics concerning names for the whole population date back to 1986. 1st January is the time of reference for the statistics concerning first names and surnames for the whole population.

2.9 Base period

Not relevant for these statistics.

2.10 Unit of measure

The unit of measure is people.

2.11 Reference period

01-01-2017 - 31-01-2017

2.12 Frequency of dissemination

The statistics are published yearly.

2.13 Legal acts and other agreements

The statistics are not subject to any specific acts.

2.14 Cost and burden

Not relevant for these statistics.

2.15 Comment

4.3 Data completeness rate

Not relevant for these statistics.

5 Accuracy and reliability

The statistics are based on the Central Population Register (CPR). The quality of the data is very high.

5.1 Overall accuracy

The statistics are based on the Central Population Register (CPR). The quality of the data is very high.

5.2 Sampling error

Not relevant for these statistics.

5.3 Non-sampling error

Not relevant for these statistics.

5.4 Quality management

Statistics Denmark follows the recommendations on organisation and management of quality given in the Code of Practice for European Statistics (CoP) and the implementation guidelines given in the Quality Assurance Framework of the European Statistical System (QAF). A Working Group on Quality and a central quality assurance function have been established to continuously carry through control of products and processes.

5.5 Quality assurance

Statistics Denmark follows the principles in the Code of Practice for European Statistics (CoP) and uses the Quality Assurance Framework of the European Statistical System (QAF) for the implementation of the principles. This involves continuous decentralized and central control of products and processes based on documentation following international standards. The central quality assurance function reports to the Working Group on Quality. Reports include suggestions for improvement that are assessed, decided and subsequently implemented.

5.6 Quality assessment

The statistics are based on the Central Population Register (CPR). The quality of the data is very high.

5.7 Data revision - policy

Statistics Denmark revises published figures in accordance with the [Revision Policy for Statistics Denmark](#). The common procedures and principles of the Revision Policy are for some statistics supplemented by a specific revision practice.

5.8 Data revision practice
