Introducing Nace Rev.2 in Denmark

Kiev 26th March 2012

Mrs Vibeke Skov Møller (vsm@dst.dk)

STATISTICS DENMARK

Activities

- Defining the new activity-codes
- Decide the principles for recoding SBR-units
- Decide methods for back-casting
- Adjust the SBR
- Recode the SBR-units according to the plan
- Back-cast the different statistics
- Organization
- Publication

Defining the new activity-codes

- Work out a draft for the new Danish activiti-codes
    - Translate the English titles and explanatory notes
    - Supdive the Nace codes to Danish codes
    - Work out introduction and more detailed description of the activity of codes statistical units
- Discuss the draft with statistical experts
- Discuss the draft with external interested parties
- Work out the book Danish Activity codes 2007
    - Now working on an internet-solution for on line access for LeU to code themselves
- Work out standard groups

Decide the principles for recoding SBR-units

- Identify problematic statistical activiti-codes
  - activity codes which are one to one (baker is stil baker; only the code has changed)
  - activity codes which are one to many (Nursing homes and Sheltered dwellings etc. are split in two)
- Identyfy internal sources for recoding
  - statistical information (agriculture, production, building and construction etc.)
- Identyfy external sources for recoding
  - government departments
  - trade associations
  - yellow pages
- Decide strategy (which kind of units, number of different units divided in groups, …)
  - enquete
  - statistical information
  - automated activity-code reasignment (using info from enquete, statistical information)
  - double-coding and overlap
  - empirical keys

STATISTICS DENMARK

Back-casting

- Identify included statistics
- Decide the period to be covered
- Decide method
  - Statistics based on (administrative) registers
    - SBR for years with double-codes
    - Years without double-codes
      - Either
        - Code one year is reused the year before, if the old code is the same
        - Old code has changed – if old code can be transformed one to one to the new code this is used
        - Rest is transform by emperical keys
      - Or
        - Transform all by emperical keys
- EU has some recomandations

Organization

- Activity-codes committee
  - Director for Business Statistics (leading meetings)
  - Head of Division for Business Register (responcible)
  - Head of Divisions for different statistics
  - Staff from Business Register Division (secretariat)
- External interest parties
  - Administrative Business Register
  - Tax authorities
  - Permanent statistical committees
  - The board of governors
  - Others
- Danish Activity codes 2007 Team
- Enquete Team
- Recoding Teams
- IT team to serve divisions

Publication

- Users in general
- Danish Activity codes 2007
  - Book
  - Internet
- Statistics
  - Give notice of the change the last time the statistic is published with old activity-cade
  - Data-banks
- Transformation keys
