

Twinning on Statistics

In November 2013, an 18 months Twinning project commenced between the Department of Statistics of Jordan and Statistics Denmark and ISTAT. The aim of the project is to strengthen the capabilities of the Department of Statistics in Jordan to compile, analyse and report statistical data by introducing good practices closely aligned to European standards and principles of high quality.

The implementation of the project will be carried out with experts from Denmark, Italy, United Kingdom, Latvia and Germany who will work closely together with statistics experts in the Department of Statistics.

The project focuses on four subject areas:

Component 1: National Accounts

Component 2: Sampling Techniques

Component 3: Quality and Metadata

Component 4: Data Warehouse

The project will implement a number of activities grouped in these four components.

The project budget is 1.200.000 euros which will be spent on implementing missions of EU member states experts in Jordan as well as on study visits to Denmark, Italy and Latvia.
