

## Twinning is....

- An equal cooperation between the beneficiary institution and sister institutions in the European Union
- Both partners have committed themselves to work towards the commonly agreed results
- Not regular training but hands-on, practical advice based on dialogue between the partners

## Purpose of the project

- To strengthen the statistical system in Jordan in terms of compilation, analysis and reporting of statistical data aligned to European standards
- To further enhance the capabilities of DoS:
  - implementation of national accounts methods according to SNA08/ESA2010
  - upgrading of sampling methodologies
  - quality control of statistical data
  - IT development

November 2013 - April 2015 (18 months)

## Components in the project

1. National Accounts
2. Sampling Methodologies
3. Quality and Metadata
4. Data warehouse

## Component 1: National Accounts

### Results to be achieved

- National Accounts System updated in line with the SNA08 and ESA2010 standards
- National Accounts fully cover the informal sector
  - GDP methodology
  - Base year in fixed price
  - Current accounts
  - Agricultural accounts
  - Supply and use tables
  - Input-output tables
  - Informal sector
- 16 missions and 1 study visit

## Component 2: Sampling methodologies

### Result to be achieved

- Improved capacity of DoS to understand and apply modern sampling techniques
  - Design of surveys
  - Seasonal adjustment
  - Weights, imputation, non-response and sampling errors
- 6 missions and 1 study visit

## Component 3: Quality and metadata

### Results to be achieved

- Quality declarations for published statistics
- Assessment of DoS' compliance with the European Statistics Code of Practice related to quality
  - European Statistics Code of Practice
  - Quality declaration – standard template
  - Quality declaration for national accounts
  - Metadata strategy
  - Quality audit
- 11 missions and 1 study visit

## Component 4: Data warehouse

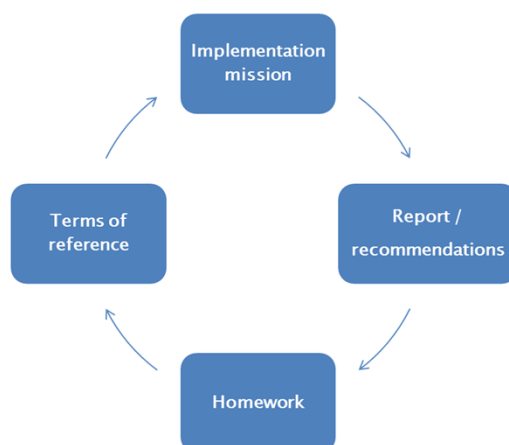

### Result to be achieved

- Review of available databases and a plan for a data warehouse structure
  - Database structure
  - IT-security
  - Online dissemination
- 10 missions and 1 study visit

## Statistics experts from the EU

- Experts from
  - Denmark (Statistics Denmark)
  - Italy (Istat)
  - United Kingdom (NI-CO)
  - Latvia (Central Statistical Bureau of Latvia)
  - Germany (Destatis)
- Implement 44 missions and 4 study visits

## Implementation of activities
