Hvis du allerede har forsøgt med QR kode kan du gå til punkt 3.
2. Allow **FortiToken** to sendt notifications
3. Click **Enter Manually**

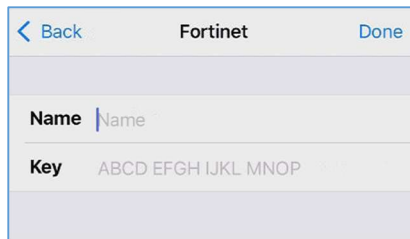

4. Select **Fortinet**

5. Enter a fitting name for your token (ex. DST or your ident) as **Name**

6. Enter the activation code as **Key**
7. Click **Done**.

A screenshot of a mobile application interface for Fortinet. At the top, there is a header bar with a blue back arrow and the text 'Back' on the left, 'Fortinet' in the center, and a blue 'Done' button on the right. Below the header, there are two input fields. The first field is labeled 'Name' and contains the placeholder text 'Name'. The second field is labeled 'Key' and contains the placeholder text 'ABCD EFGH IJKL MNOP'. Both fields have a small eye icon to their right, indicating a toggle for visibility. The background of the form is a light gray color.

8. The Token will then appear in your app.

The Token is now ready to use for signing in to remote.dst.dk
