Structural surveys on business and institutions

EU Twinning Project IL/12 CRIS 2015/370-467
Component C: Infrastructures for agricultural statistics
ICBS - Jerusalem
12th – 15th June 2018

Summary

- Context
- FR implementation in Istat since 2008
- Objectives
- Network organisation and Data collection mode
- Sample
- Content
- Survey results and impacts on FR implementation

Context

- Need to recourse to administrative data sources
(FAO 2020 Programme – World agricultural census;
EU Regulation for the 7° Agricultural census 2020)
- Increase efficiency, timeliness and frequency of data release, minimize the response burden and costs
- National statistical programme (answer mandatory, administrative sanction for all units included in the sample list)
- *Business register (Reg 1177/2008)*

FR implementation in Istat since 2008

- ✓ 2008 Integrated Base of Administrative Sources (BIFA)
- ✓ 2008 - 2009 Survey to check coverage and quality of the first draft of farm register (CLAG)

=> main aim was to assess eligibility rules used to identify units to be included in the register

2010 release of the pre-census list for the realization of the 6° agricultural census (that substituted the pre-census survey done in order to get from the municipalities the holdings list to be surveyed through census)

Farm register implementation in Istat since 2008

.....*follow*

- 2011 Post census enumeration

2014/15 FR 2013 implementation

2016 Survey to support Farm register implementation

2017/18 FR 2014 implementation

.....*in the meantime*

- Extraction of samples for agricultural survey

.....*in the next future*

- Direct release of data

Objectives

- To estimate parameters for the farm register model implementation from administrative archives
- To verify relationship among units included in the register in order to reduce double counting (over coverage)
- To assess structural variables included in the register (land use, livestock)
- To estimate a labour force component (self-employed workers) on farms per single unit

Estimates parameters for units inclusion in the register - Sources

Integrated Administration and Control System (AGEA) land and holder

Integrated Administration and Control System (AGEA) only holder

System for the Identification and Registration of livestock

VAT declaration for agricultural activity

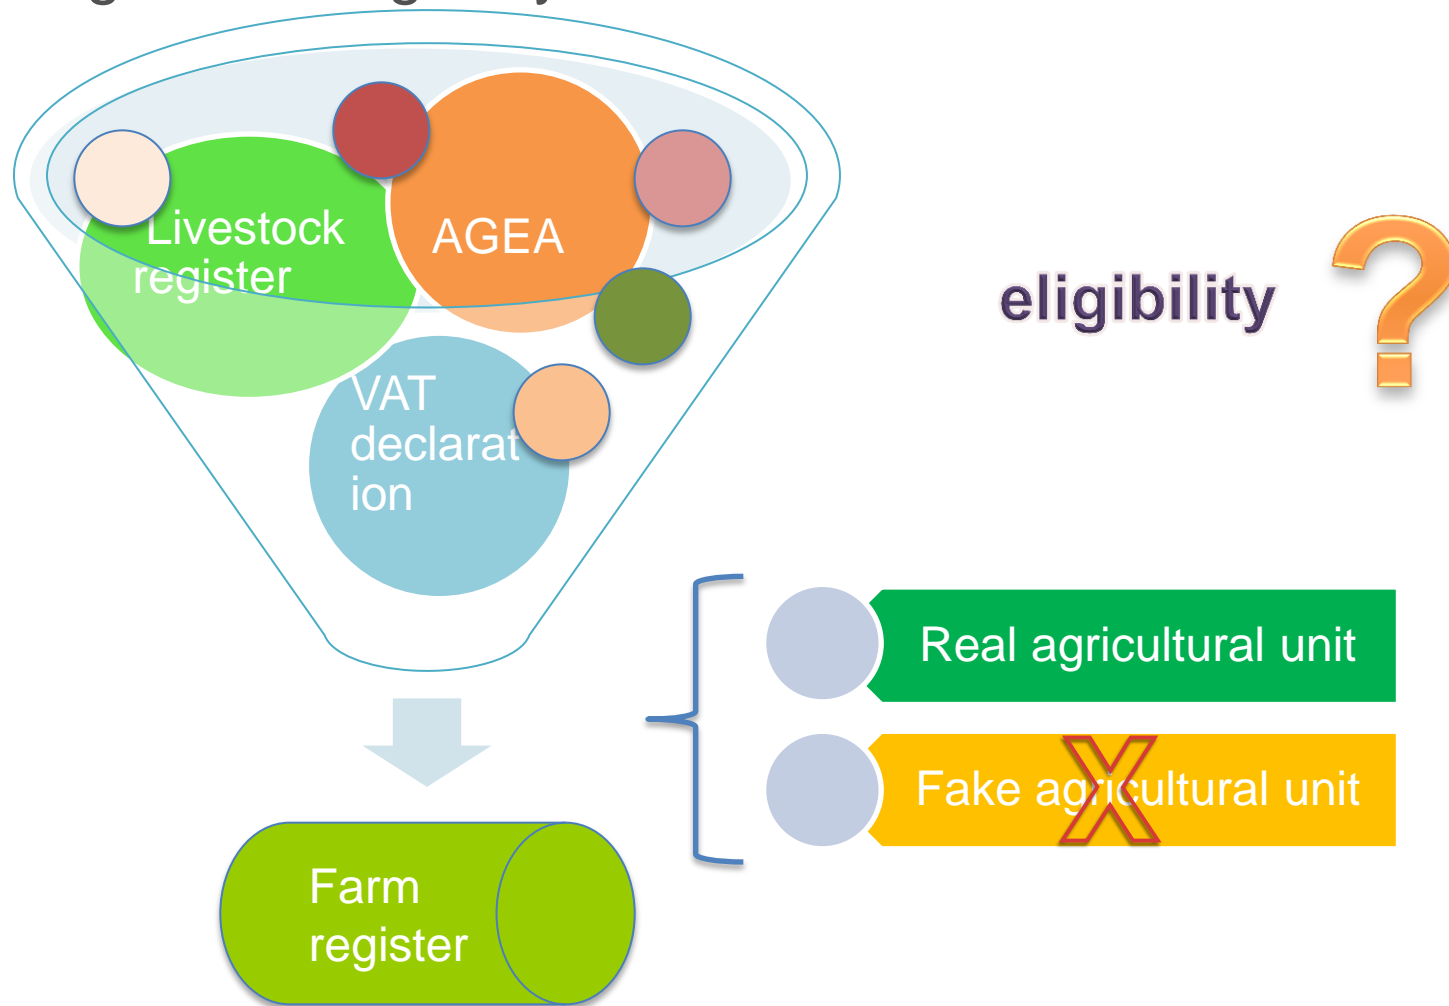

Agricultural income associated to land register

Agricultural census 2010

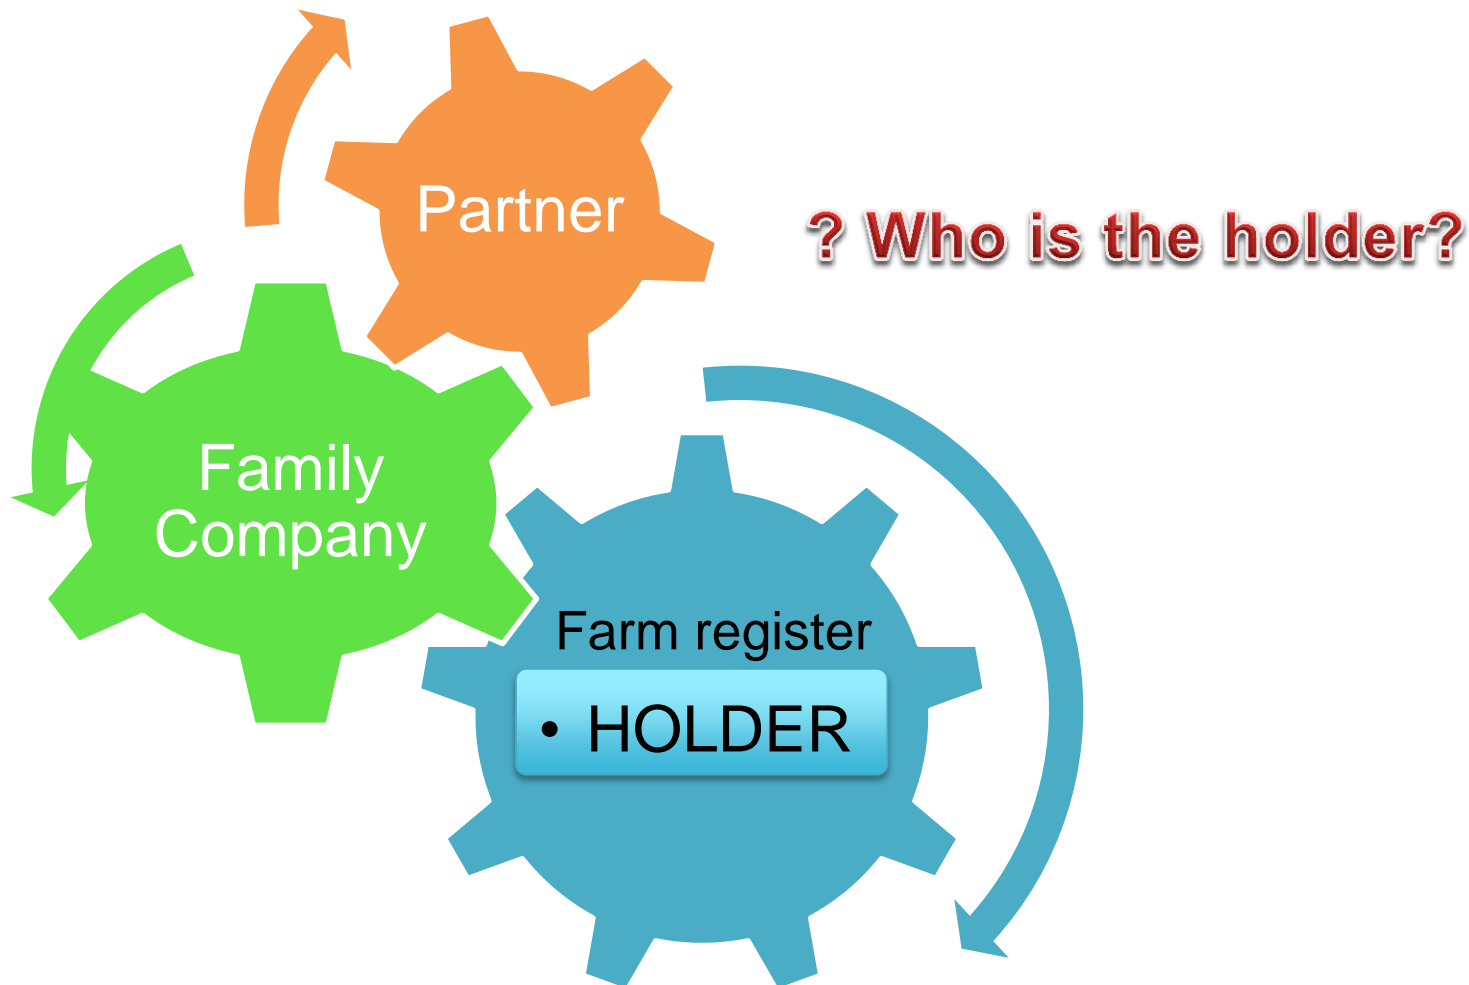

List of Agritourism farms

List of farms under quality production scheme

Estimates parameters for units inclusion in the register - Eligibility

Verify relationship among units (clusters)

Assess structural information on the unit

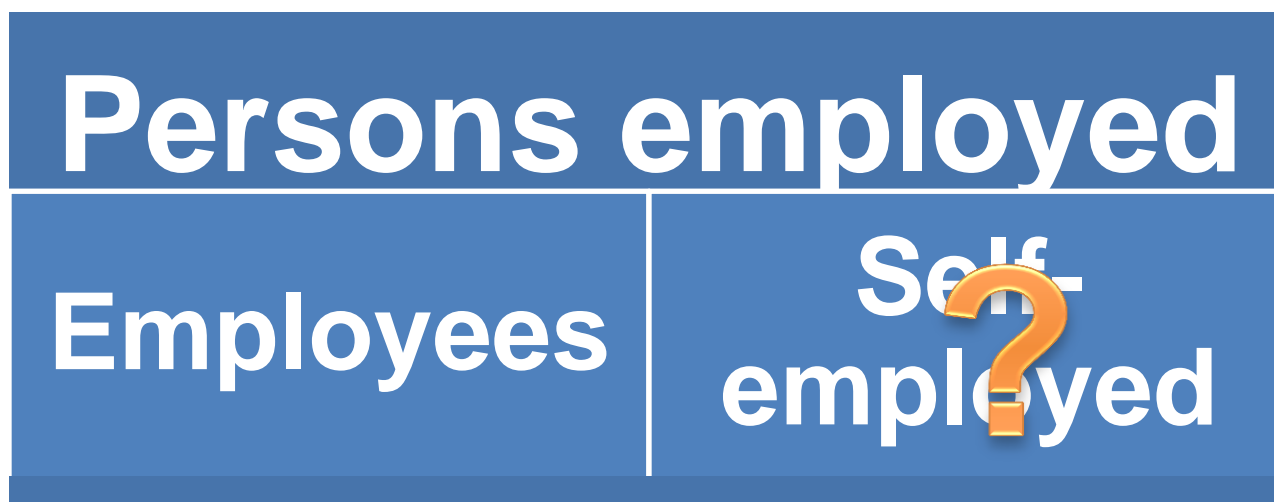

Land use

- ❖ Arable land
 - of whichrice*
- ❖ Kitchen gardens
- ❖ Permanent crops
 - of whichvineyards*
 -olive*
 -citrus*
 -pear*
 -peach*
 -nursery*
- ❖ Pasture and meadows
- ✓ **UAA**
- ❖ Permanent crops for Wood production
- ❖ Forest
- ❖ Other land
- ✓ **Total farm land**

Livestock

- ❖ Bovines
- ❖ Buffaloes
- ❖ Sheeps
- ❖ Goats
- ❖ Pigs
- ❖ Other livestock

Estimate self-employed labour force per single unit

Survey characteristics

- ☐ National Statistical Plan 2014-2016 (code IST-02574) and it was compulsory for the respondent
- ☐ Run between april, 19th and july, 29th 2016.
- ☐ Data validation ended in september, 15th 2016
- ☐ Reference year:
 - ☐ 31° october 2015 for land extension
 - ☐ agrarian year 2014-2015 for land use and labour force
 - ☐ year 2015 for livestock (heads, annual average)

Network organisation and Data collection mode

The survey is organised as on field as

- ✓ personal CAWI (Computer Assisted Web Interview) or PAPI (Paper and Pen Interview) whether internet line connection would be not available

at the holder residence address

Or as

- ✓ CATI (Computer Assisted Web Interview)
- only in rare cases, whether accessibility of holder residence would result very difficult

Network organisation and Data collection mode

Regions are responsible for the survey at local level
(Statistical offices and agricultural departments)

- Providing Interviewers (internal or hired personnel)
- Making interviews
- Making data entry, where necessary
- Doing check and validation of the questionnaires
- Monitoring the survey during data collection

Network organisation and Data collection mode

In order to manage such organizational and data collection models Istat implemented a web-based integrated system which comprises:

- an online questionnaire with data editing functions;
- a management and monitoring module.

Network organisation and Data collection mode

- Data entry of the questionnaire on-line (Data Entry)
- Check of the questionnaire divided into a data entry phase and a back office phase
- Back office check and validation run by the person in charge at territorial level
- Summary reports for monitoring purposes

Network organisation and Data collection mode

- **Data entry check** is mainly oriented to assess
 - Data validity according to kind of recorded information
 - Internal coherence of the recorded information
- **Back office check** is mainly oriented to assess
Coherence of the recorded information with the ones derived
from the administrative sources both qualitative and
quantitative

Functions/profiles of the management and monitoring system

- Data collection network (Person in charge of the survey at local level, interviewers with connections between sample units / interviewer and person in charge; monitoring system)
- Administrators and Supervisors at Central and regional level

Survey Unit & Sampling frame

Survey Unit

- the Unique identification code for agricultural unit (CUAA) or the fiscal code (CF) of the unit included in the list

Agricultural unit

Sampling frame

- Units carrying out agricultural activity as defined by NACE with
 - ✓ Land (even if only kitchen gardens)
 - ✓ Livestock (including heads for self-consumption)
 - ✓ Unit exclusively forest

Agricultural unit definition

Recall the statistical definition of

“Agricultural holding” that is:

a single unit, both technically and economically, constituted by

- *land, even not contiguous, and*
- *by machineries*
- *managed by a holder i.e. natural or juridical person or institution*
- *that undertakes agricultural, forest and livestock activities – as primary or secondary -, alone or in a partnership as defined by NACE*

Sample extraction: Eligibility (according to sampling experts) criteria

FR 2013 distribution according to eligibility defined by sampling experts (4,592,757 units)

Sample extraction list

«certainly non-eligible»

- Units in IACS but only with information on manager or with land not in common with another holder less than 1 hectare or with at least 50 % of UAA in common with another holder

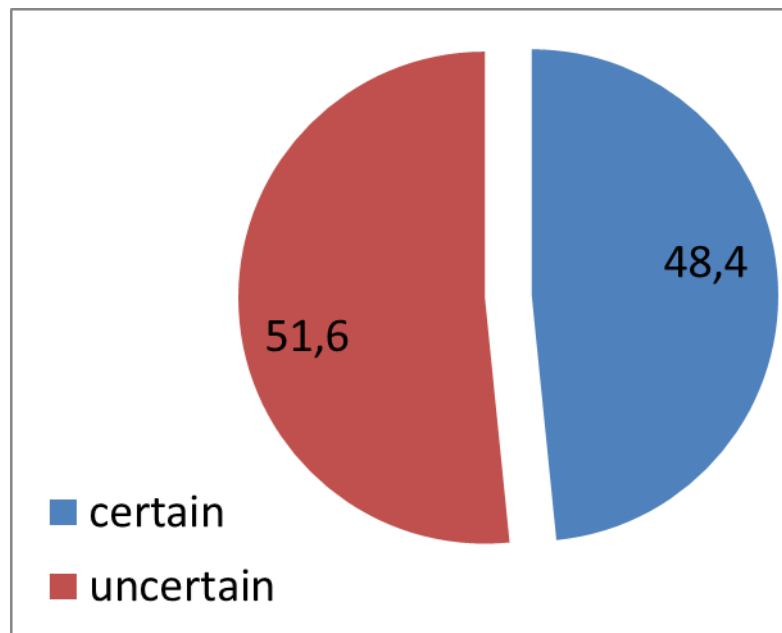

«certainly eligible»

- Units in IACS or in cadastre register with flower cultivation

«uncertain eligibility»

- Remaining units

Sample distribution by Eligibility (according to sampling experts) criteria

Of which 31 % without any contact information (telephone, ordinary or certified email)

Sample extraction criteria

Stratification variables

- Administrative regions (according to the location of the unit headquarter)
- UAA (< > 2 ha)
- LSU (< > 2 LSU)
- Combination of Admin sources
- Special cases (+195 units)

Final number depending on

- Stratification variables
- Variability of estimated variable
- **Budget constraint**
- **Survey network requirement**

21.565 units
675 municipalities

Sample distribution by region according to RES (residence) location

REGIONS	Sample	Interviewers
01 PIEMONTE	1.189	6
02 VALLE D'AOSTA/VALLÉE D'AOSTE	597	3
03 LOMBARDIA	1.252	6
05 VENETO	1.338	7
06 FRIULI-VENEZIA GIULIA	719	4
07 LIGURIA	868	4
08 EMILIA-ROMAGNA	1.222	6
09 TOSCANA	1.400	7
10 UMBRIA	727	4
11 MARCHE	772	4
12 LAZIO	1.291	6
13 ABRUZZO	799	4
14 MOLISE	550	3
15 CAMPANIA	1.050	5
16 PUGLIA	1.986	10
17 BASILICATA	613	3
18 CALABRIA	1.109	6
19 SICILIA	1.881	9
20 SARDEGNA	932	5
21 BOLZANO/BOZEN	567	3
22 TRENTO	703	4
Total	21.565	108

Questionnaire content

(10100101)

Numero identificativo Istat

Sistema Statistico Nazionale
Istituto Nazionale di Statistica

Rilevazione campionaria di controllo del Registro delle aziende agricole

(Piano Statistico Nazionale 2014-2016 IST- 02574)

Questionario di unità agricola

A Notizie anagrafiche, residenza o sede legale del conduttore

Nel caso di notizie diverse da quelle prestampate, riportare nei quadri verdi sottostanti le notizie nuove, le variazioni o le integrazioni.

Codice Unico di Azienda Agricola (CUAA) o Codice fiscale della persona fisica o della società o ente che conduce l'unità

Cognome e nome della persona fisica o denominazione della società o ente che conduce l'unità

Denominazione provincia

Denominazione comune

Indirizzo (Via/Piazza/Località e numero civico)

C.A.P.

The questionnaire includes a preliminary section and 3 thematic sections

i) INFORMATION ON THE HOLDER, ii) INTERVIEW'S RESULT,
iii) AREA MODIFICATION,
iv) LINKS WITH OTHER UNITS, v) HOLDER HEADQUARTER LOCATION
vi) STATUS OF ACTIVITY

SECTION I – INFORMATION PER UNIT WITH LAND

SECTION II – INFORMATION PER UNIT WITH LIVESTOCK

SECTION III – INFORMATION ON LABOUR FORCE IN THE UNIT

NOTES

**STATISTICAL CONFIDENTIALITY, PROTECTION OF CONFIDENTIALITY
and RIGHTS OF INTERESTED PARTIES**

Answers to be given

Is the unit in list an agricultural unit?
Is it changed over time?
Is it linked to other units in the list?
Is it active ?

Is the information derived from administrative sources of good quality?

Can we estimate a labour force component through this survey?

**A) INFORMATION ON THE HOLDER, B) INTERVIEW'S RESULT,
C) AREA MODIFICATION, D) LINKS WITH OTHER UNITS, E) HOLDER
HEADQUARTER LOCATION, F) STATUS**

A. INFORMATION ON THE HOLDER

- CCUAA agricultural unit (pre-printed, not changeable)
- Name, postal address, certified e-mail, ordinary e-mail, telephone (pre-printed, changeable)

B. INTERVIEW'S OUTCOME

B1. Surveyed unit  **Continue interview**

B2. Not surveyed unit

B3. Not existing unit

A) INFORMATION ON THE HOLDER, B) INTERVIEW'S RESULT,
C) AREA MODIFICATION, D) LINKS WITH OTHER UNITS, E) HOLDER
HEADQUARTER LOCATION, F) STATUS

B2. Not surveyed unit

- a. Holder not found
- b. Refusal
- c. Other reasons (specify.....)

Stop interview

B3. Not existing unit

- a. Never been an agricultural unit
- b. Agricultural land or livestock definitively abandoned without transfer to others [DATE]
- c. Agricultural unit completely rented, gave in, to others in a new or an already existing holding [DATE]
- d. Unit linked to an existing holding with a different holder (family member or other)

**A) INFORMATION ON THE HOLDER, B) INTERVIEW'S RESULT,
C) AREA MODIFICATION, D) LINKS WITH OTHER UNITS, E) HOLDER
HEADQUARTER LOCATION, F) STATUS**

INFORMATION TO BE REQUIRED FOR UNITS

B1. Surveyed unit

C.1. AREA MODIFICATION AND LINKS BETWEEN UNITS

In the reference agricultural year 2014 - 2015 – and with respect to the previous agricultural year – the unit has been subjected to modification of the UAA ?

- i. None
- ii. Purchase or rent from other units
- iii. Transfer or rent to others
- iv. Land use different from agricultural use

C.2. IS THE UNIT INDICATED IN THE «A» BOX OFFICIALLY REPRESENTED FOR ADMINISTRATIVE PURPOSE BY ONE OR MORE FISCAL CODES?

If YES

D. UNITS LINKED TO THE ONE IN LIST

- CCUA o CF (fiscal code), name municipality of residence

**A) INFORMATION ON THE HOLDER, B) INTERVIEW'S RESULT,
C) AREA MODIFICATION, D) LINKS WITH OTHER UNITS, E) HOLDER
HEADQUARTER LOCATION, F) STATUS**

INFORMATION TO BE REQUIRED FOR UNITS

B3. Not existing unit

- c. Agricultural unit completely rented, gave in, to others in a new or an already existing holding [DATE]
- d. Unit linked to an existing holding with a different holder (family member or other)

D. UNITS LINKED TO THE ONE IN LIST

- CCUA o CF (fiscal code), name municipality of residence

Stop interview

E. UNIT HEADQUARTER LOCATION

- Municipality (pre-printed, changeable)

F. UNIT STATUS

- a. Active
- b. Temporarily not active

Continue interview

Stop interview

SECTION I. INFORMATION PER UNIT WITH LAND

LAND USE

- ❖ Arable land
 - of whichrice*
- ❖ Kitchen gardens
- ❖ Permanent crops
 - of whichvineyards*
 -olive*
 -citrus*
 -pear*
 -peach*
 -nursery*
- ❖ Pasture and meadows
- ✓ **UAA**
- ❖ Permanent crops for Wood production
- ❖ Forest
- ❖ Other land
- ✓ **Total farm land**

Area (ha)
Agricultural year
2014 – 2015

SECTION II. INFORMATION PER UNIT WITH LIVESTOCK

LIVESTOCK

- ❖ Bovines
of which for self-consumption
- ❖ Buffaloes
of which for self-consumption
- ❖ Sheeps
of which for self-consumption
- ❖ Goats
of which for self-consumption
- ❖ Pigs
of which for self-consumption
- ❖ Other livestock Y/N

**Livestock heads
2015 average**

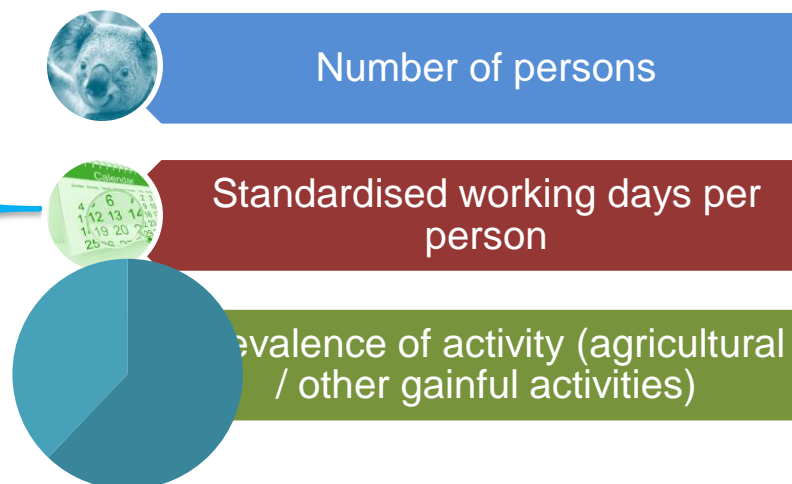

SECTION III. INFORMATION ON LABOUR FORCE IN THE UNIT

SELF-EMPLOYEES

What categories?

- ❖ Holder
- ❖ Holder spouse
- ❖ Other family relationship
- ❖ Partner in company

What information?

Reference period?

Agrarian year 2014-2015

SECTION III. INFORMATION ON LABOUR FORCE IN THE UNIT

Traditionnaly information at farm level is collected on

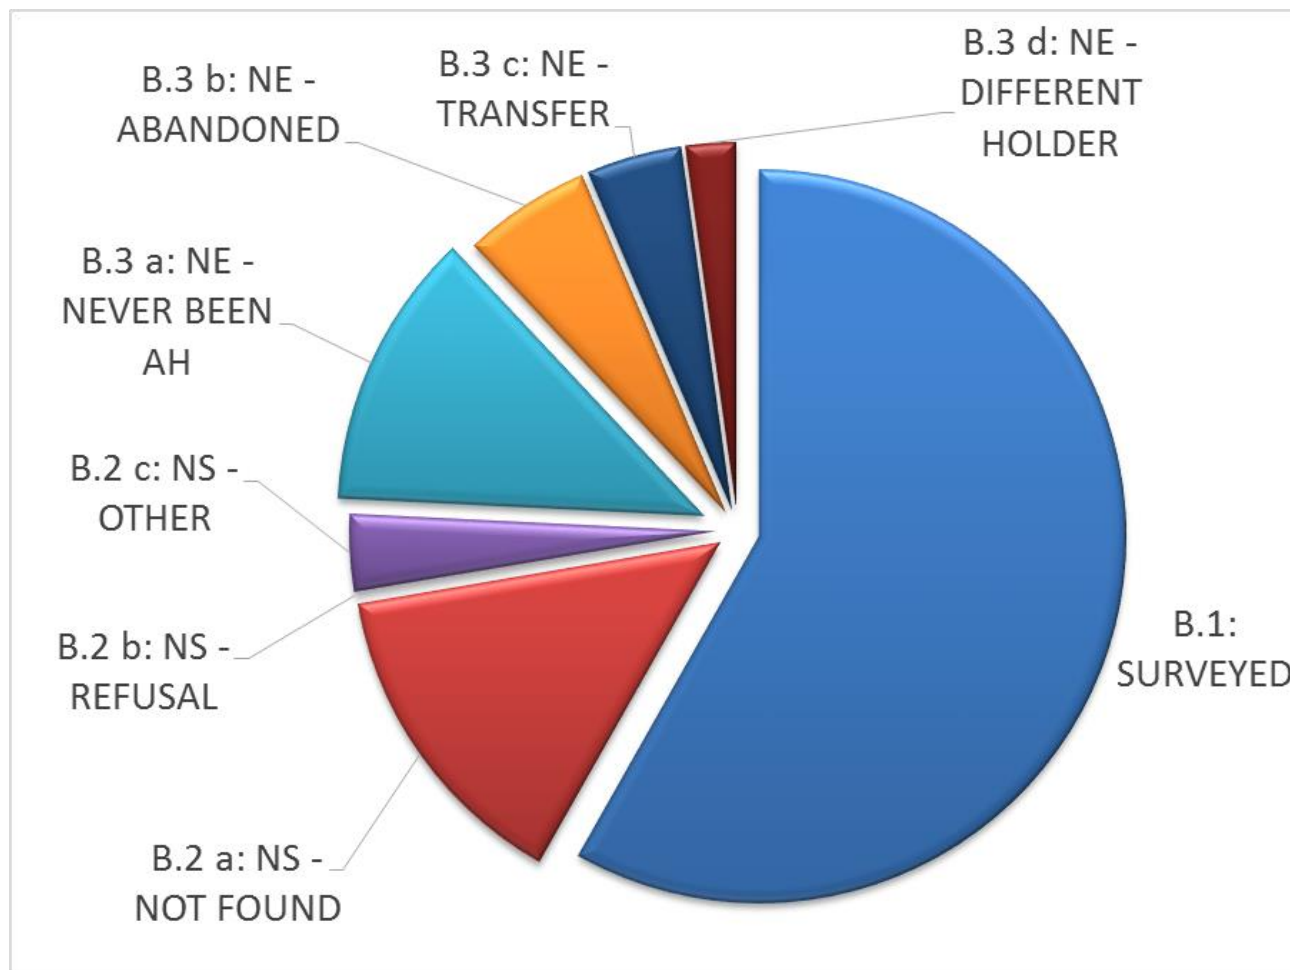

- ❖ Family labour, often seasonal and part-time as labour force is mainly based on it
- ❖ Other kind of labour force

SURVEY RESULTS: distribution of units with B interview's outcome according to SFR eligibility

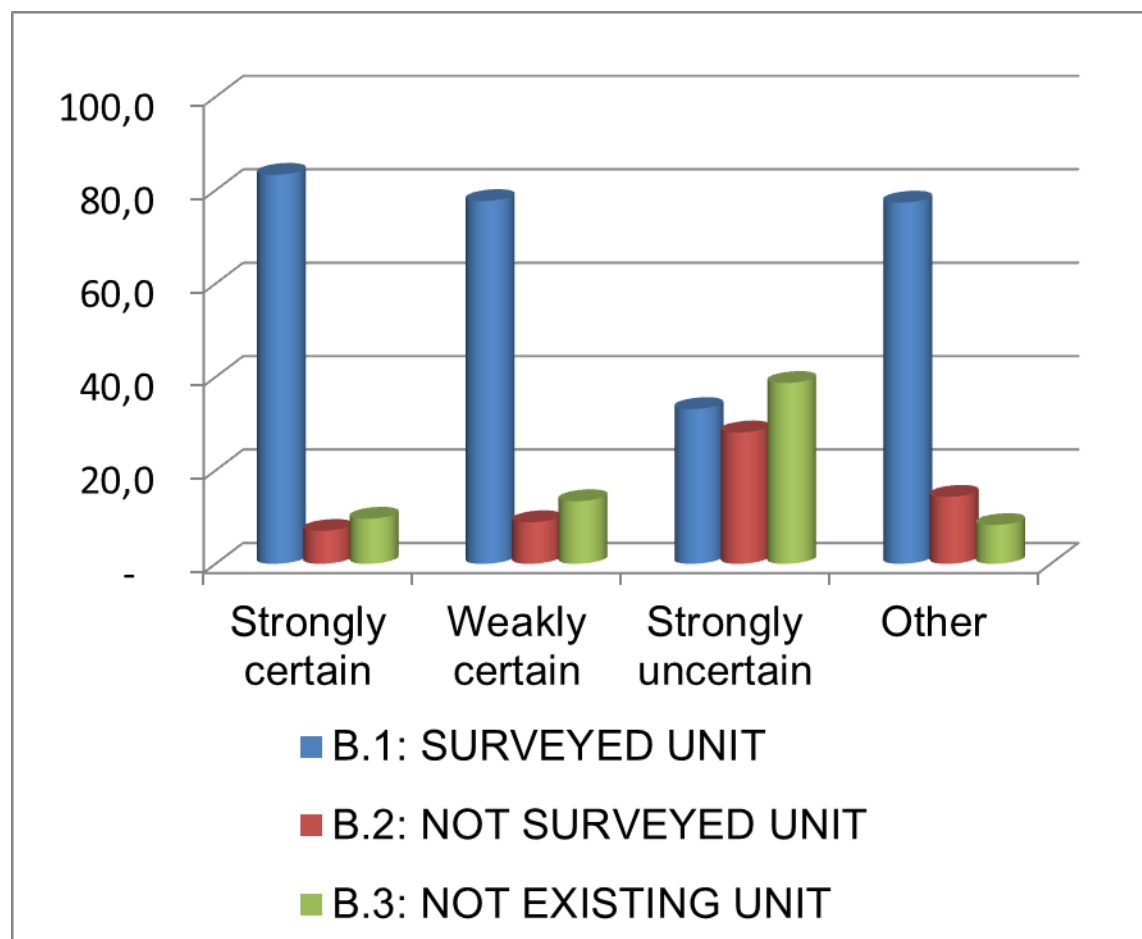

21,099 units out of 21,565 were recorded with a «B» outcome (B1. Surveyed unit; B2. Not surveyed unit, B3. Not existing unit)

SURVEY RESULTS: distribution of units by interview's outcome

SURVEY RESULTS: distribution of units by SFR eligibility and B outcome

BACK OFFICE DOUBLE CHECK

Strongly and weakly certain:

Recorded as B3a - Never been an agricultural unit
Mainly due to the fact that the holder doesn't
recognize itself as an agricultural holding

Weakly uncertain units:

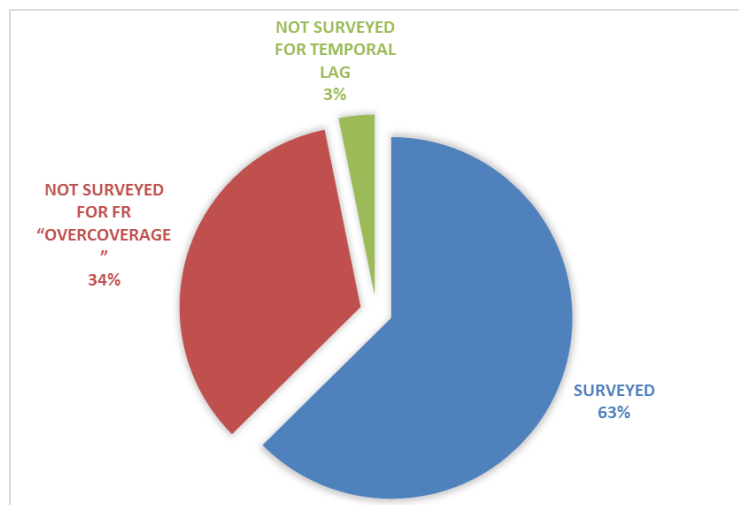

Recorded as existing unit (B1)
But in fact they were B1 inactive,
units not cultivated and without any kind of
agricultural activity

B2a Holder not found (12,3% of total outcomes):
mainly concentrated on uncertain units (75%)

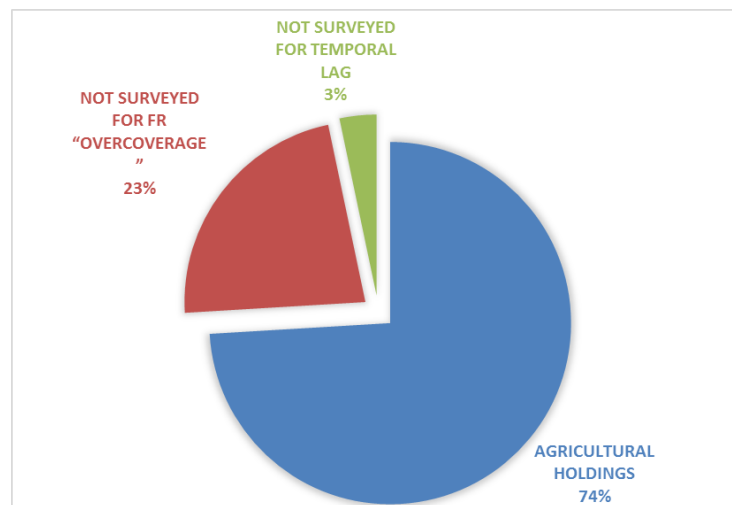

EVALUATION OF THE RESULTS

Riclassification of the interview's outcomes and estimations with calibrated sample weights

(Vannini I.; Righi P.)

SAMPLE (Gnesi C.; Mancini L.)

FARM REGISTER (Vannini I.; Righi P.)

EVALUATION OF THE RESULTS

Estimation of AH number and standard working days

(Vannini I.; Righi P.)

FARM REGISTER				AGR CENSUS 2010
# Agricultural holdings	Confidence interval			# Agricultural holdings
	Cl.l(95%)	Cl.u(95%)	CV%	
1,596,028	1,573,050	1,619,006	0.73	1,620,884

FARM REGISTER				AGR CENSUS 2010
# Standard working days	Confidence interval			# Standard working days
	Cl.l(95%)	Cl.u(95%)	CV%	
195,040,795	188,638,613	201,442,977	1.67	200,904,955

EVALUATION OF THE RESULTS

Evaluation of the eligibility rules

(Vannini I, Mancini L.)

A logistic regression model was adopted to improve the prediction of the unit being an agricultural holding

The existing 38 rules were used to predict the probability of a unit being eligible determining an improvement in the classification of the units of the Farm Register

units included correctly in the FR

The discriminating power of alternative hierarchical eligibility rules was estimated using a non-parametric approach (permutations).

EVALUATION OF THE RESULTS

For FR 2014 implementation a mixed methodology was adopted

- 1) Probabilistic model of Eligibility estimation
- 2) Deterministic model based on specific strong rules for including / excluding units (duplications) / based on changes due to AH demography

FR characteristics

FR includes:

- ✓ Holder's DB: ID, general information, residence
address, juridical form
 - ✓ AH DB: ID, structural information (land, livestock)
AH location, AH headquarter location
 - ✓ Cadastral Land DB: land use according
- + Complete and integrated List of the fiscal codes

Thanks for paying attention!
