# Connection to Researcher servers at DST – MAC Users

This Guid descripbes how to connect to the research servers at Statistics Denmark.

To Sign in to the servers you need to install the "Windows App" from App store

- Open App Store and search for "Windows APP"
- Download and install the app

Connect to the servers

Start your preferred browser (e.g. Firefox, Edge or Google Chrome.)
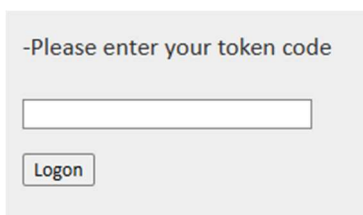

Go to the following site: https://remote.dst.dk

The following image appears in the browser:

Enter your Researcher username (3 or 4 characters) under *Username*

Enter your password for remote.dst.dk under *Password*

Then click *Logon*

Enter the code from your FortiToken app
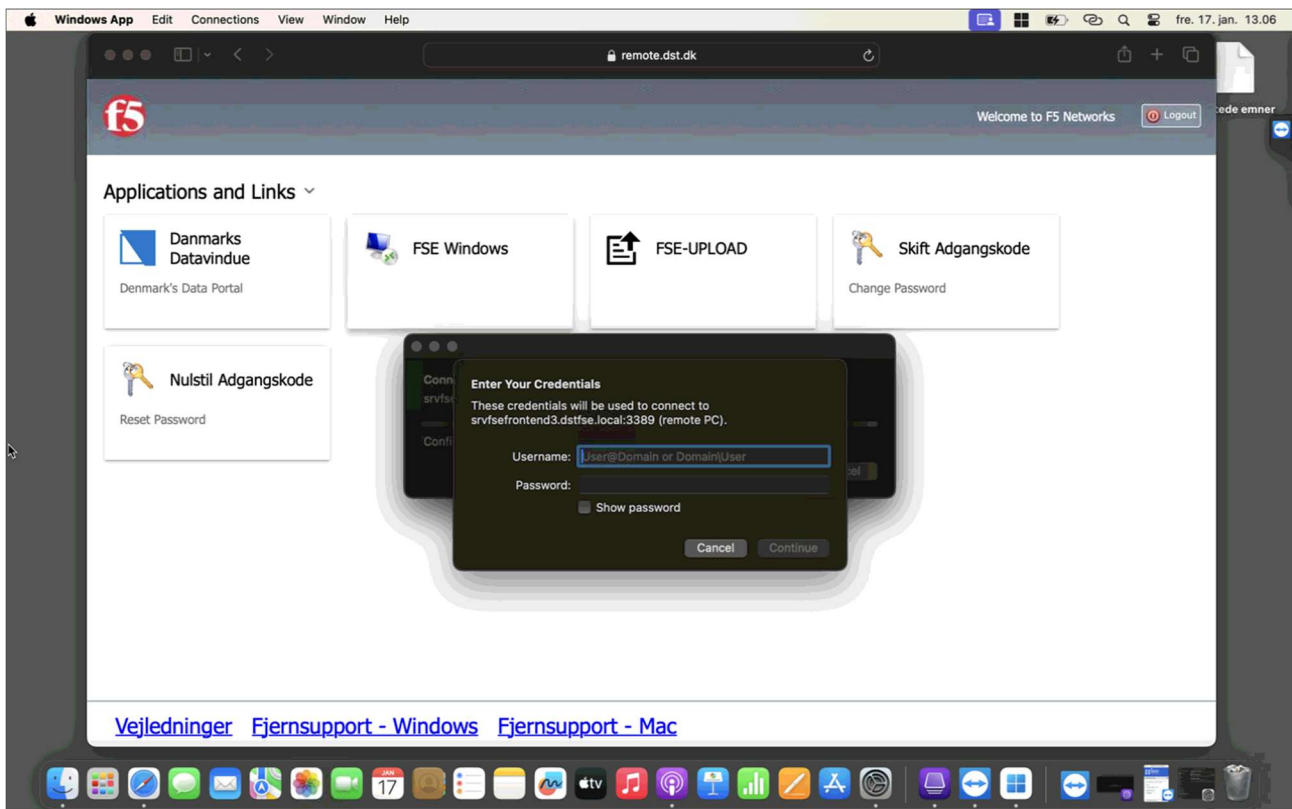

The following image will appear in the browser:
(Note that the number of icons you have, depends on which rights you have)
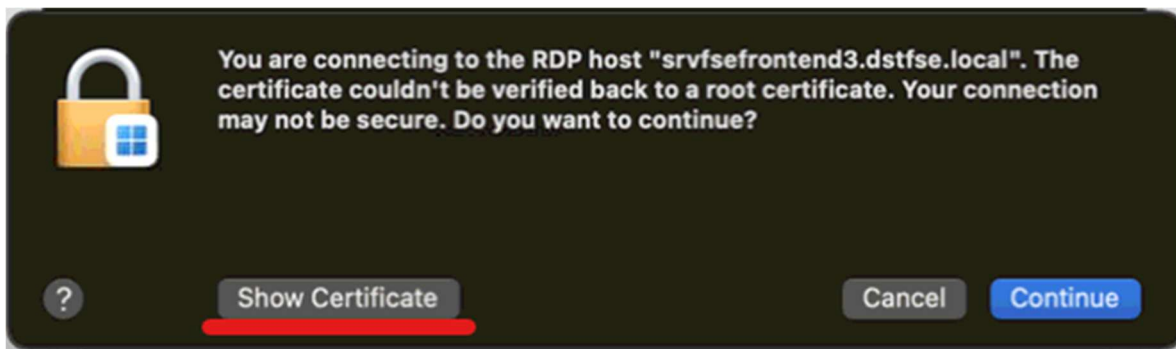

Click on the server you want to connect to

Vil du tillade, at webstedet åbner "Windows App"?

Tillad altid   Annuller   Tillad

Click "Allow"

Enter your username and password for the project you want access toUsername (fx foko709999 eller foko709999)

Do the following steps for the certificate error to stop showing up.
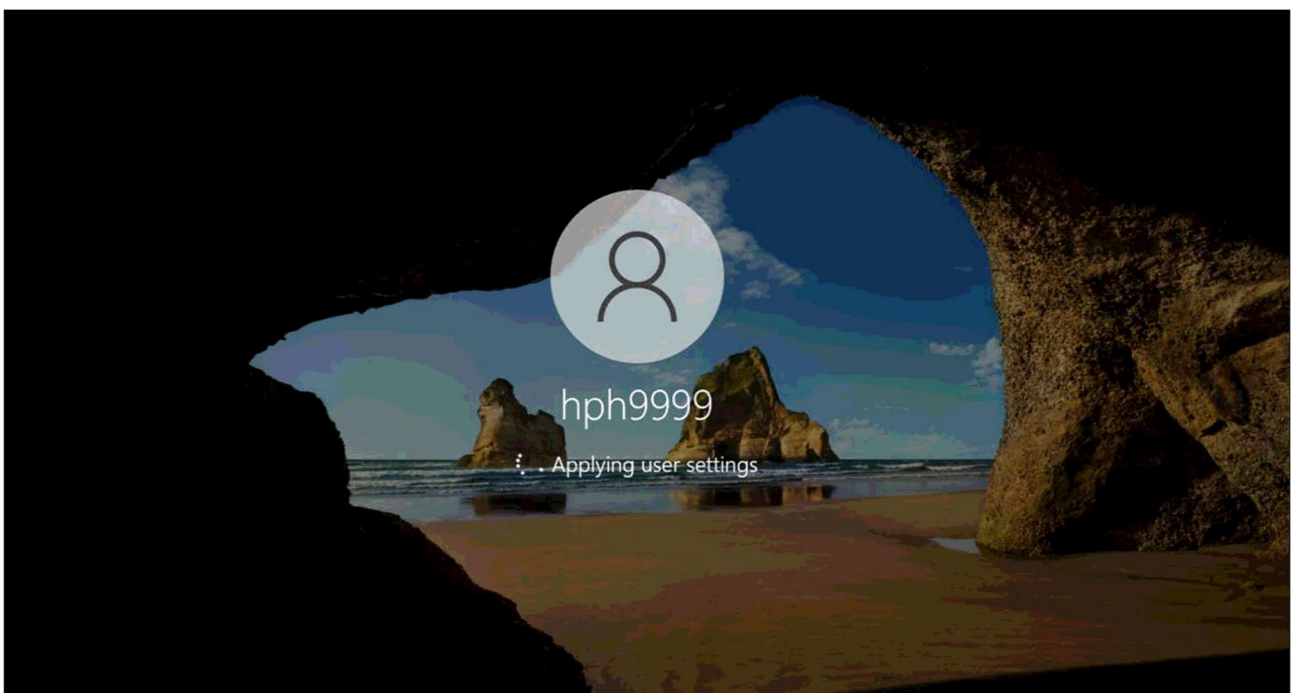

Click *Show Certificate*

Check of *Always trust … when connection to …*

Click *Continue*

Enter your username and password for your MAC user and click update settings.
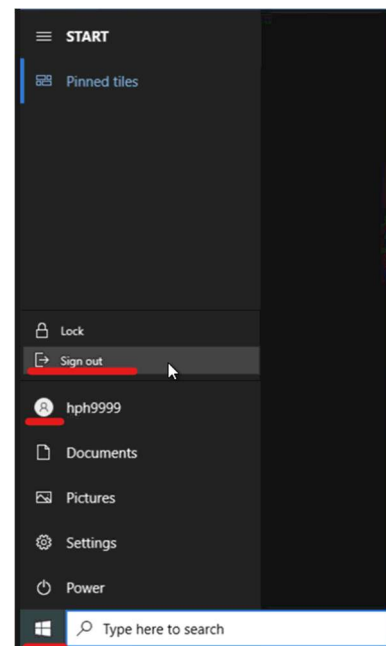

You'll then be signed in to the server

After you finish your work on the server, you must sign out of the server.

You sign out of the server using the following steps:

1) Click on the windows icon
2) Click on the user icon
3) Click **"Sign out"**

Afterwards, click Logout in the top left corner of the Browser:
