16:00 Tour and dinner in Jerusalem (optional) with the ICBS Team			16:00	End of the work day
No. 1 April 1985 April			16:00	Tour and dinner in Jerusalem (optional) with the ICBS Team

Wed 13 June 18	Meeting	Main to	opic: Production of farm statistics based on multiple sources
	room -	07:45	Pick up from Prima Kings hotel by ICBS driver.
	MARD	09:00	BC: First day review
		09:15	BC: The current plan and vision for production of farm
			statistics in Israel
		10:15	Coffee break
		10:30	MS: Production of farm statistics in Italy
			What is published and what interval
			Output documentation
			• What surveys are the most essential to collect at routine basis
			• Whom are the main users of the statistics and what role does in play for decision makers
			Dissemination and strategy
			How is user need, EU Regulations and SDG indicators ensured
		11:15	MS: Production of farm statistics in Denmark
			What is published and what interval
			 Why a census is needed when having good administrative files?
			Output documentation
			What surveys are the most essential to collect at routine basis
			Who are the main users of the statistics and what role
			does in play for decision makers
			Dissemination and strategy
			• How is user need, EU Regulations and SDG indicators ensured
		12:00 12:45 13:30	BC/MS: Discussion and outlining a revised plan for Israel
			based on lessons learned and input from MS
			Moderator Dr. Moshe Yanai ICBS
			Lunch break
			Leaving MARD by car for visit to Mikveh Israel – the first agricultural school in Israel (Tour start at 14:00)
		16:00	Tour in old Jaffa in Tel-Aviv (Optional)
		20:00	Returning to Prima Kings Hotel by taxi

of needs for additional support Milestones • Setting up milestones for a the roadmap 12:00 Lunch break 13:15 BC/MS: Drafting a practical longtime roadmap - continued 15:00 Final remarks and thanks	Date	Place	Time	Event
Expected participants: MS experts, Dr. Moshe Yanai, Ms. Chani Shamir, and Mr. Noam Tal and the Twinning Team 08:15	Thurs 14 June 18	Skarim	Main to	ppic: Outlining a long term plan for routine data collection in
ICBS and Mr. Noam Tal and the Twinning Team 08:15 Pick up by Charlotte at Prima Kings Hotel 09:06 BC: Second day review 09:15 BC/MS: Drafting a practical longtime roadmap – Issues to be addressed (Tentative – might be changed according lesson learned and input from the MS experts) Farm register • Cooperation and interaction with data provider including Ministries, other subject units etc. – Use of cooperation agreements, MoU, network, steering committees • Quality check of data (by providers and the ICBS) • Structured methodology for maintaining the farms register • List of variables in the farm register Outlining future routine data collection and surveys • Currently topics for follow up surveys in Israel are proposed of Quantities and prices of plant produce and conservation of Food loss • Use of pesticides in agriculture • Use of fertilizers • Organic agriculture • Income from agriculture • Income from agriculture • Income from agriculture • Economic surveys of farms, economic account of agriculture (before as organic agriculture) • Economic surveys of farms, economic account of agriculture (before as organic agriculture) • Economic surveys of farms, economic account of agriculture (before as organic agriculture) • Economic surveys of farms, economic account of agriculture (before as organic agriculture) • Economic surveys of farms, economic account of agriculture publication on the next generation of farmers • Outline future routine data collection from administrative sources SDG indicators • How to ensure fulfillment of the SDG indicators on agriculture (buts; //mistals un.org/sdes/indicators/indicators-list/) Publications • Future publication and output Sustainability • Discussion on how to ensure sustainability and identification of needs for additional support Milestones • Setting up milestones for a the roadmap 12:00 Lunch break 13:15 BC/MS: Drafting a practical longtime roadmap - continued		floor –	Israel	
Discussion Discussion			-	
BCMS: Deratting a practical longtime roadmap - Issues to be addressed (Tentative — might be changed according lesson learmed and input from the MS experts) Farm register Cooperation and interaction with data provider including Ministries, other subject units etc. — Use of cooperation agreements, MoU, network, steering committees Quality check of data (by providers and the ICBS)				<u> </u>
BC/MS: Drafting a practical longtime roadmap - Issues to be addressed (Tentative — might be changed according lesson learned and input from the MS experts) Farm register • Cooperation and interaction with data provider including Ministries, other subject units etc. — Use of cooperation agreements, MoU, network, steering committees • Quality check of data (by providers and the ICBS) • Structured methodology for maintaining the farms register • List of variables in the farm register Outlining future routine data collection and surveys • Currently topics for follow up surveys in Israel are proposed — Quantities and prices of plant produce — Land conservation — Food loss — Use of pesticides in agriculture — Use of fertilizers — Organic agriculture — Use of fertilizers — Organic agriculture — Environmental friendly crops (not necessarily defined as organic agriculture) — Economic surveys of farms, economic account of agriculture Information on the next generation of farmers • Outline future routine data collection from administrative sources SDG indicators • Outline future routine data collection from administrative sources SDG indicators • How to ensure fulfillment of the SDG indicators on agriculture — (https://unstats.un.org/sdgs/indicators/indicators-list/) Publications • Future publications and output Sustainability • Discussion on how to ensure sustainability and identification of needs for additional support Milestones • Setting up milestones for a the roadmap 12:00 Lunch break 13:15 BC/MS: Drafting a practical longtime roadmap - continued				Pick up by Charlotte at Prima Kings Hotel
