## 1. General comments

This mission report was prepared within the Twinning Project “Strengthening of the National Statistical System of Armenia – Phase II”. This was the second activity in component 4 and the actions planned for this activity were carried out as scheduled.

The purposes of the mission were:

- Review of collected pilot data
- Analysis of quality of data
- Finalisation of questionnaire
- Plan for integration of questionnaire into the annual ILCs
- To involve relevant stakeholders in the discussions

The consultants would like to express their sincere thanks to all officials and individuals met for the kind support and valuable information which they received during the stay in Armenia and which highly facilitated their work. The views and observations stated in this report are those of the consultants and do not necessarily correspond to the views of EU, NSSRA, Istat, Statistics Finland or Statistics Denmark.

## 2. Assessment and results

### Assessment of current situation:

Since the last mission in September 2015, NSSRA has conducted a pilot survey for 48 households. The pilot survey collected data for six sections and 26 variables on material deprivation, both on household or individual level, as well as child-specific questions. More specifically, output variables were mainly recorded at the household level, but there were five questions asked for each adult (aged 16 or more) household member and five questions concerning all children in the household.

### Quality assessment of the pilot survey

The quality of the pilot survey data was assessed from two different angles. First of all, the main ILC survey included some questions that were very similar to ones in the pilot survey. Secondly, since the contents of the pilot survey were based on variables that had been collected in the EU-SILC-survey, the distributions of answers from the Armenian pilot survey could be compared with the distributions from the EU-SILC survey. While most EU-countries cannot be considered a good benchmark to the Armenian data, comparing the Armenian results with low-income EU-countries, such as Bulgaria, Romania, Latvia, Lithuania or Hungary, can give some indication of the plausibility of the pilot survey results. Results from the pilot survey, as well as comparable data from the Armenian ILC-survey and selected EU-countries are shown in Annex 8.

Coherence between the pilot survey and the July ILC survey was tested for questions that are very similar in the two sources. These questions were: the possession of computer, internet connection, telephone and car and the ability to keep home adequately warm.

For the questions on the possession of durables, the coherence between the pilot and the ILC-survey was very good. The purpose of the pilot was to distinguish between the household not affording to have a set of durables and household not having these durables for other reason. The pilot survey served this purpose well and, with very few exceptions, the distributions of answers were almost identical between the two surveys. From households selected for the pilot, most of the ones that reported having a certain durable in the July ILC-survey

, reported having it in the pilot. Given the time difference between the two surveys, minor differences are acceptable.

The data on material deprivation of children was collected at the household level. There were minor inconsistencies in the “not applicable” answers, which may indicate problems in understanding the questions. A new arrangement, formulated in the following paragraphs, is proposed in order to overcome them.

Comparisons with the results for low-income countries in the EU (EU-SILC surveys 2009 and 2012) indicate that the results for Armenia seem plausible. For some variables the pilot survey shows pretty high degrees of deprivation in Armenia. The biggest differences between Armenia and low-income EU-countries were detected in arrears on utility bills, the ability to keep home adequately warm, in the ability to afford a meal with meat, chicken or fish every second day, getting together with friends, affording leisure activities, and making ends meet without difficulties. Given the low income level in Armenia, even in comparison with low-income EU-countries, this may be a reflection of the actual situation.

### 3. Conclusions and recommendations

#### Conclusions and recommendations based on the pilot survey

Because of the good coherence and plausibility of the pilot survey data, the conclusion of the analysis is to keep the questions in the same format as they were in the pilot survey. Some translations were reviewed for clarification.

By including questions on material deprivation for the total population ILCS will gain the opportunity to estimate the pertinent indicator in accordance with the newly approved rules at European level, starting from 2016: NSSRA will have it available at the same time European National Statistical Institutes do. Moreover, NSSRA will also be able to estimate the current version of the same indicator, valid from 2004 to 2015. The larger burden associated for asking three more questions (needed for estimating MD indicator in its current version, but unnecessary for the new one) should be more than compensated by the benefits for full comparability with the European data.

As for child-related material deprivation questions, the only meaningful change proposed is they should be asked for every child instead of using the household level.

With this approach, indicators that are comparable with the standards used in the EU-SILC ad hoc-module, as well as ones following the UNICEF standards, can be calculated.

The questions on material deprivation should be asked in the context of the ILC-survey also in the future. The plan to proceed is:

1. To include most questions on material deprivation as a separate module in 2016;
2. To integrate a selected number of questions into the main questionnaire in 2016;

3. To fully integrate the questions on material deprivation into the main questionnaire in 2017;
4. To integrate the questions on child-related material deprivation into the Child needs questionnaire in 2016/17, according to the fieldwork timing established by NSSRA and the relevant stakeholders.

At the end of the paragraph a synthetic prospect reports placement, rearrangements and changes for the new questions. Moreover, each part of the proposal is detailed in annexes 4-7.

### Material deprivation for the total population

There were two sections in the pilot. The first was made by 15 questions, asked at household level. The second consists of 5 more questions and they were collected at individual level. All of these questions should be included in ILCS. However the full integration will be pursued for 2017 survey's operations. A proposal concerning the placement of the new questions in the current ILCS questionnaire's structure was discussed and approved by NSSRA staff (annex 7 accounts for the 2017 new questionnaire).

As for 2016, only marginal changes are allowed into the main structure considering the advanced phase of working activities already done for the next year survey. The integration can be easily fulfilled for three questions on durables (having a computer / internet connection / telephone), as they are already asked for in the main survey. In this case, it is sufficient to change currently used answers' modalities in order to distinguish "no, because cannot afford" vs "no, for any other reason". Two more items (having a washing machine / colour TV) could be added to this set. As for "having a car", being already in the ILCS questionnaire, following changes are made: answers' modalities and a filter for respondents' selection (only for rural households) should be removed.

These changes were approved by NSSRA staff and already implemented both in the English and Armenian version of the 2016 ILCS questionnaire. They are documented in annex 5.

It was also agreed that the remaining questions (14) will be included in a separate module for 2016 operations. The module's informational content (included in annex 4) will be collected for the total ILCS sample.

### Material deprivation of children

The section on material deprivation of children is integrated in the Child needs questionnaire (CNQ). The CNQ already includes similar items and has a similar approach to reporting the results. This issue was discussed in a separate meeting with the UNICEF representative. In the meeting a consensus was achieved on both integration of the section to the CNQ and reporting the questions for all children individually.

The integration of the pilot questions into the CNQ included some modifications to the CNQ (new version included in Annex 6). The first table in the child needs questionnaire is split into two parts. The first part consists of questions asked for children aged 1-17 (five questions from the pilot, one from the original CNQ), and the second table consists of questions asked for school-aged children aged 6-17 (one question from the pilot, remaining questions from the CNQ). Since there was a potential overlap between two questions in the CNQ (Does your child receive invitations/invite friends for get-togethers with friends at least twice a month?) and one pilot question (Does your child have celebrations on special occasions (birthdays,

name days, religious events)?), the word “parties” was removed from the CNQ-questions. In the fieldwork, the questions in the CNQ could be asked in connection with one of the visits to households for the ILCS-interview.

#### Improving the coherence of treating item nonresponse

In the Armenian ILC-survey there are some questions that have answering categories such as “Don’t know” or “Difficult to answer”. For most of the questions, such option does not exist, leading to a situation where it is impossible to recognise the difference between data errors and true item nonresponse, i.e. cases where respondent either does not know the answer or does not want to give an answer. This issue was brought up by the NSSRA staff during the mission.

Consequently, consistent coding for item nonresponse should be provided for the interviewers, but the options “do not know / no answer” should not be given as such to the respondents during the interview. The interviewers should be advised to give their best effort to get an answer from the household for each question, and to mark the answer as “-1” (or any other standardised symbolic value), if the respondent is unable to provide an answer.

## Prospect for integrating pilot's questions into the main surveys (ILCS & CNQ) in 2016 and 2017

### I. Questions 1- 4 are asked on household – level

1. Could you tell me if your household...

<b><u>Answers' modalities:</u></b>	<b>Allocation in ILCS for 2016</b>	<b>Allocation in ILCS for 2017</b>
1.Yes 2.No - cannot afford 3.No - other reason		
1.1 has a computer	ILCS C8_13 [answers' modalities for all the items in C8 have to be changed accordingly]	ILCS C8_13 [answers' modalities for all the items in C8 have to be changed accordingly]
1.2 has an internet connection	ILCS C8_14 [answers' modalities for all the items in C8 have to be changed accordingly]	ILCS C8_14 [answers' modalities for all the items in C8 have to be changed accordingly]
1.3 has a telephone (fixed line or mobile)	ILCS C8_9 & ILCS C8_10 [answers' modalities for all the items in C8 have to be changed accordingly]	ILCS C8_9 & ILCS C8_10 [answers' modalities for all the items in C8 have to be changed accordingly]
1.4 has a colour TV	It has to be added to C8 set of question [answers' modalities for all the items in C8 have to be changed accordingly]	It has to be added to C8 set of question [answers' modalities for all the items in C8 have to be changed accordingly]
1.5 has a washing machine	It has to be added to C8 set of question [answers' modalities for all the items in C8 have to be changed accordingly]	It has to be added to C8 set of question [answers' modalities for all the items in C8 have to be changed accordingly]
1.6 has a car/van for private use	ILCS C26 [answers' modalities for all the items in C26 have to be changed accordingly] The set of questions C26-C30 is currently posed only to rural households. At least C26 has to be collected for all households	ILCS C26 [answers' modalities for all the items in C26 have to be changed accordingly] The set of questions C26-C30 is currently posed only to rural households. At least C26 has to be collected for all households
1.7 can replace worn-out furniture if needed	Separate ILCS module	Section C – Housing Conditions. The best position for this new question is between the current C8 and C9.

2. In the past twelve months, has the household been in arrears, i.e. has been unable to pay on time due to financial difficulties for:

<b><u>Answers' modalities:</u></b>	<b>Allocation in ILCS for 2016</b>	<b>Allocation in ILCS for 2017</b>
1. Yes, once 2. Yes, twice or more 3. No 4. Not applicable		
2.1 Rent or mortgage payment for the main dwelling	Separate ILCS module	Section C – Housing Conditions. The best position is between the current C3 and C4. It would be useful to add a question for mortgage (“do the household pay a mortgage to own this dwelling?”) All households paying a rent (C2=2,3,4,5) and paying a mortgage to own the dwelling (C1=1 and “mortgage=yes” should be asked for arrears in rent or mortgage payments.
2.2 The utility bills (heating, electricity, gas, water, etc.) of the main dwelling	Separate ILCS module	The best position for this new question is between the current C15 and C16, <b>after</b> the question on garbage disposal (C15).
2.3 Hire purchase installments or other loan payments	Separate ILCS module	The best position is in section J – Debts. It will asked in a new question, separated from Table 1. At the end of table 1, it has to be added a new item for “Any other purposes”.

## 3. Could you tell me, can your household afford...

<b><u>Answers' modalities:</u></b>	<b>Allocation in ILCS for 2016</b>	<b>Allocation in ILCS for 2017</b>
1. Yes 2. No		
3.1 An unexpected required expense of 40.000 dram and pay through its own resources (without borrowing or asking for financial help)?	Separate ILCS module	Section K – Subjective estimation of the living standard seems more appropriate. The Section is currently for individuals aged 16+. It has to be added, at the beginning, a new table to be asked at the household level. The question will be the first of this new Table for Section K.
3.2 To keep home adequately warm?	Separate ILCS module	The best position for this new question is between the current C14 and C15.
3.3 To have a meal with meat, chicken, fish (or vegetarian equivalent) every second day?	Separate ILCS module	Section K – Subjective estimation of the living standard seems more appropriate. The Section is currently for individuals aged 16+. It has to be added, at the beginning, a new table to be asked at the household level. The question will be the second of this new Table for Section K.
3.4 To go for a week's annual holiday, away from home, including stays in a second dwelling or with friends/relatives (entire household)	Separate ILCS module	Section K. The Section is currently for individuals aged 16+. It has to be added, at the beginning, a new table to be asked at the household level. The question will be the third of this new Table for Section K.

## 4. Is your household's total income enough to pay the required minimal expenses?

1. With great difficulty 2. With difficulty 3. With some difficulty 4. Fairly easily 5. Easily 6. Very easily	<b>Allocation in ILCS for 2016</b>	<b>Allocation in ILCS for 2017</b>
	Separate ILCS module	Section K – Subjective estimation of the living standard seems more appropriate. The Section is currently for individuals aged 16+. It has to be added, at the beginning, a new table to be asked at the household level. The question will be the fourth of this new Table for Section K.

A proposal for putting the question M15 in this new part of Section K is included

**II. Question 5 is asked all the persons in the household aged 16 or more.**

For each person in the household aged 16 or more, could you tell me if they have or do the following?

HH member's ID numbers from the list of the HH members, >=16 years <b><u>Answers' modalities:</u></b> 1. Yes 2. No – cannot afford 3. No - other reason	<b>Allocation in ILCS for 2016</b>	<b>Allocation in ILCS for 2017</b>
5.1. have two pairs of properly fitting shoes ( <del>including a pair of all-weather shoes</del> )	Separate ILCS module	Section K – Subjective estimation of the living standard seems more appropriate, which is already asked to individuals age 16+. The question will be the first of this new Table for Section K.
5.2. Replace worn-out clothes (including old-fashioned ones) by some new	Separate ILCS module	Section K – Subjective estimation of the living standard seems more appropriate, which is already

(not second-hand) ones		asked to individuals age 16+. Second in the new table.
5.3. Get-together with friends/family (relatives) for a drink/meal at least once a month	Separate ILCS module	Section K – Subjective estimation of the living standard seems more appropriate, which is already asked to individuals age 16+. Third in the new table.
5.4. Regularly (several times per year) participate in a paid leisure activity outside home such as sport, cinema, concert	Separate ILCS module	Section K – Subjective estimation of the living standard seems more appropriate, which is already asked to individuals age 16+. Fourth in the new table.
5.5. Spend a small amount of money each week on him/herself (without having to consult with any other person)	Separate ILCS module	Section K – Subjective estimation of the living standard seems more appropriate, which is already asked to individuals age 16+. Fifth in the new table.

**III. Question 6 is asked all the persons in the household aged 1-16**

6. \* Could you tell me whether all the children (under 16 years old) above 1 year in your household have or do the following...

## Annex 4. Questionnaire for social exclusion module 2016

General note:

- sets of questions in 1-4 have to be asked on household-level;
- set of questions in 5 has to be asked at individuals aged 16+;

### 1. In the past twelve months, has the household been in arrears, i.e. has been unable to pay on time due to financial difficulties for:

	1 Yes, once	2 Yes, twice or more	3 No	Not applicable
<i>rent or mortgage payment for the main dwelling</i>				
<i>the utility bills (heating, electricity, gas, water, etc.) of the main dwelling</i>				
<i>hire purchase instalments or other loan payments</i>				

### 2. Could you tell me if your household can replace worn-out furniture, including separate items of furniture, if needed?

1. Yes
2. No, because cannot afford
3. No, any other reason

### 3. Could you tell me, can your household afford...

	1 Yes	2 No
<i>an unexpected required expense of 45.000 DRAM and pay through its own resources (without borrowing or asking for financial help)?</i>

## Annex 5. Proposed changes for the ILCS-questionnaire in 2016

General notes:

- modifications in green;
- questions' enumeration is not changed with respect to 2015 official version;
- new questions are identified according to the proposed positioning: as an example the two new questions between existing C3 and C4 will be enumerated C3a and C3b;
- when changes in answers' modalities are proposed, they are reported both old and new values.

Changes occur only in Section C. The short form of the present document, annexed to the Mission Report, includes only part of this section, the others being unchanged.

## Annex 7. Proposed changes for the ILCS-questionnaire in 2017

General notes:

- modifications in green;
- questions' enumeration is not changed with respect to 2015 official version;
- new questions are identified according to the proposed positioning: as an example, the two new questions between existing C3 and C4 will be enumerated C3a and C3b;
- when changes in answers' modalities are proposed, they are reported both old and new values.

Changes occur in Sections C, J, K, M. The short form of the present document, annexed to the Mission Report, includes only these sections, the others being unchanged.
