

Recent developments following BPM6

Implementing MSITS2010 and BPM6 in Denmark

Study visit ICBS and Bank of Israel 27 October 2014

Casper Winther, deputy head of division, external economy
Poul Uffe dam, chief advisor, external economy

Outline

- From old to new manuals, intellectual property
- Processing and related transactions
- Processing - identifying the goods flows
- Processing - validation

From old to new manuals

- **Questionnaires** compatible with BPM6 introduced from January 2013 - modest adjustments
- **Computer services**
 - Computer services
 - + Use of software
 - + Software originals
 - - Reproduction and distribution of computer software
- **Audiovisual and related services**
 - Audiovisual and related services
 - + Audiovisual originals
 - - Reproduction and distribution of audiovisual and related products

Extract of the Danish service questionnaire

Services related to intellectual property
Franchises and registered trademarks
Franchises and royalties from the use of registered trademarks
Purchases/sales of registered trademarks
Computer and information services
Computer services (incl. software license fees, software development, and repairs)
Licenses to reproduce and/or distribute software
Purchases/sales of software originals
Audiovisual services
Audiovisual and related services
Licenses to reproduce and/or distribute audiovisual and related products
Purchases/sales of audiovisual originals
Research and development services
R&D work undertaken on a systematic basis to increase the stock of knowledge
Licenses for the use of outcomes of R&D
Purchases/sales of proprietary rights arising from R&D (patents, copyrights, industrial processes, and designs)
Other R&D services (concerning products or processes)

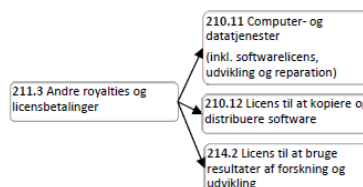

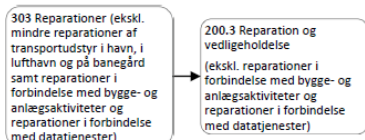

Map of the changes in service codes

Ændringer i tjenesteskemaet i 2013

Som følge af ændrede internationale retningslinjer er en række tjenestekoder ændret i forbindelse med indberetningen i 2013. Oversigten viser sammenhængen mellem de berørte koder i 2012 og 2013. Læs mere om indholdet af de nye koder i *Vejledning til udenrigshandel med tjenester*, som kan findes på www.dst.dk/tjenester.

1. Reparationer

Der oprettes en ny kode for reparationer, som nu også indeholder reparationer, som tidligere var indeholdt i forskellige hjælpetjenester for transport.

Direkte køb og salg af licenser og patenter underopdeles efter type.

3 3/16/2015

Processing and related transactions

- New information collected in the ITS questionnaire:
 1. Manufacturing services on physical inputs owned by others (200.4)
 2. Purchases of goods abroad to be processed abroad (304)
 3. Sales of goods abroad after processing abroad (305)
- Challenge: Goods sent for/received after processing must be identified in the ITGS in order to be excluded from the BoP goods account

6

Processing - identifying the goods flows

- Nature of transactions codes (NoT) and Customs procedure codes (CPC) from the ITGS used to identify the goods movements
 - NoT: only partly available in Denmark. Poor quality – new validation procedures implemented.
 - CPC: problematic source: 1) in terms of CPC inward processing flows might not be processing under contract. 2) expected under coverage in case of export for outward processing.
- Using NoT and CPC allows for adjustment at the detailed commodity level which provide coherence with the SU tables.

Processing - validation

- ITGS vs. ITSS
 - A validation system shared between the two statistical domains has been established
 - In addition to checking for internal inconsistencies of the NoT reports we check for consistency between reported information on the ITG and ITS questionnaires.
 - Using CPCs to check for consistency with ITS reporting; validate the processing fee
- “Industry sales” valuable for error checking purposes
