Remote Acces Innovations

Why?

Which?

When?

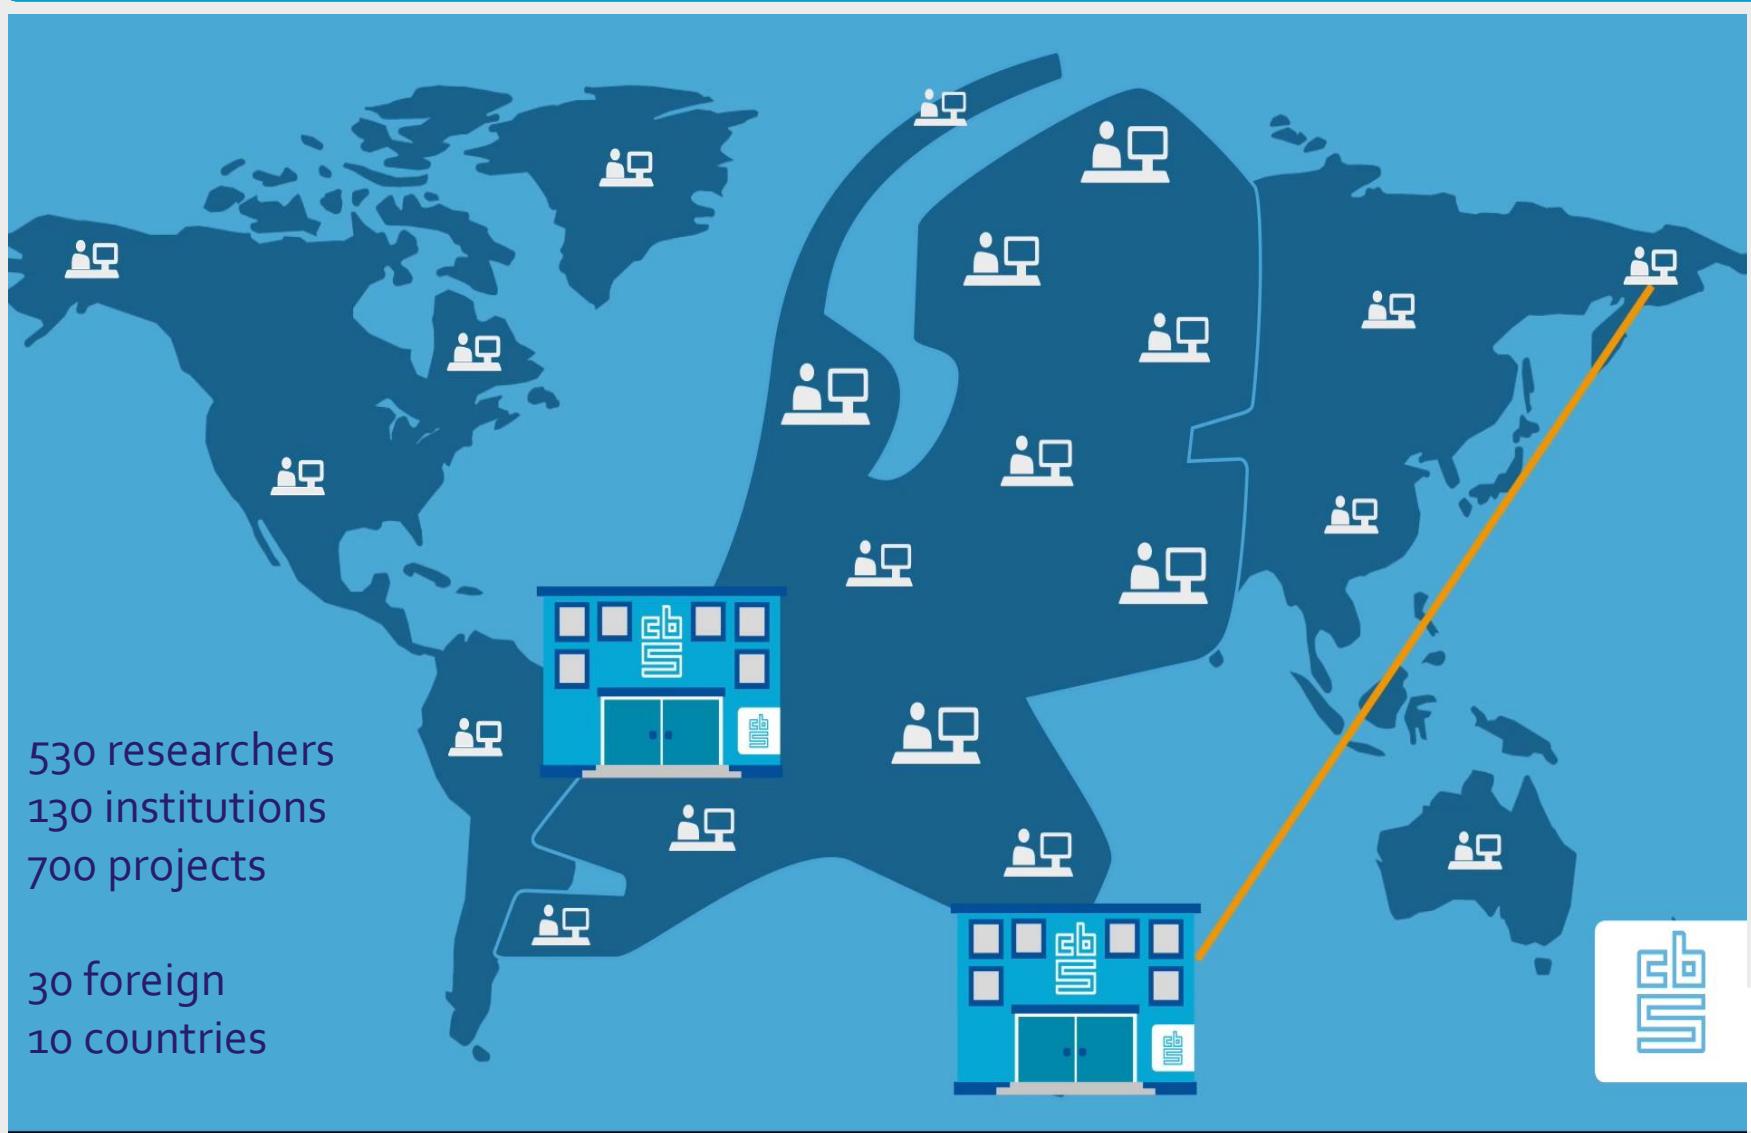

Remote Access now

Remote Access now

Remote Access now

Why innovate?

RA Computer – lockable room

- High costs
- Logistic problems

Authentication system

- Technical limitations
Biometric control

Increase privacy awareness

- Ignorant/careless weakest link security

Output services

- Small output expensive
- Output check too much time
- Rules output check too strict
- Descriptions of output too much time
- Output check unnecessary

Which innovations?

Access authentication

- No lockable room, RA-PC
- New authentication system

Output & Privacy Awareness

- Output check afterwards
- Output Light
- Digital awareness test
- Awareness questions login + flyer with privacy rules

Measures

- Measures when rules are broken: communicated explicitly

When?

Phase 1:
Development
Sep-Dec 2016

- Developing new RA-Authenticatiesysteem
- Adjustments: RA documentation , Internet, etc.
- Measures policy
- Digital privacy awareness test and login questions

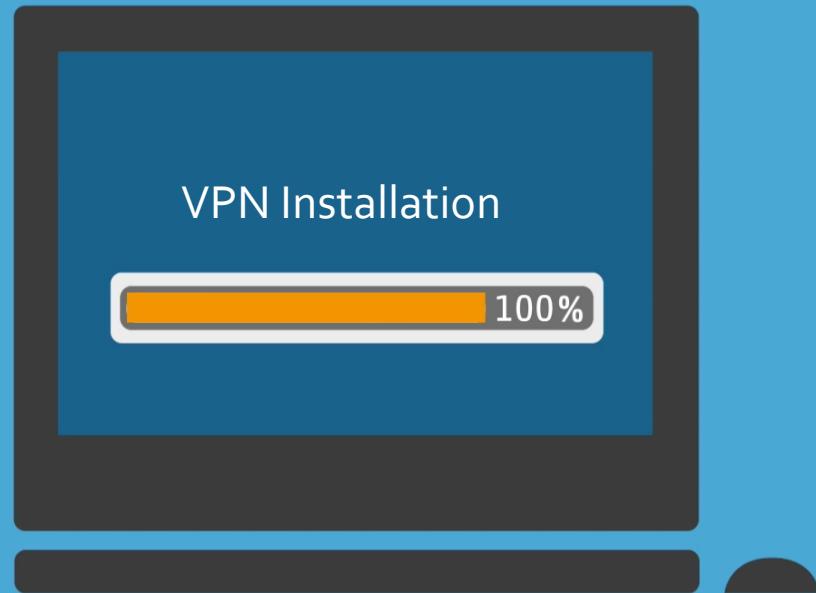

Phase 2: Pilot
Jan-Mar 2017

- Pilot New RA services (SCP, CPB, PBL) – 18 januari
- Evaluation - end februari

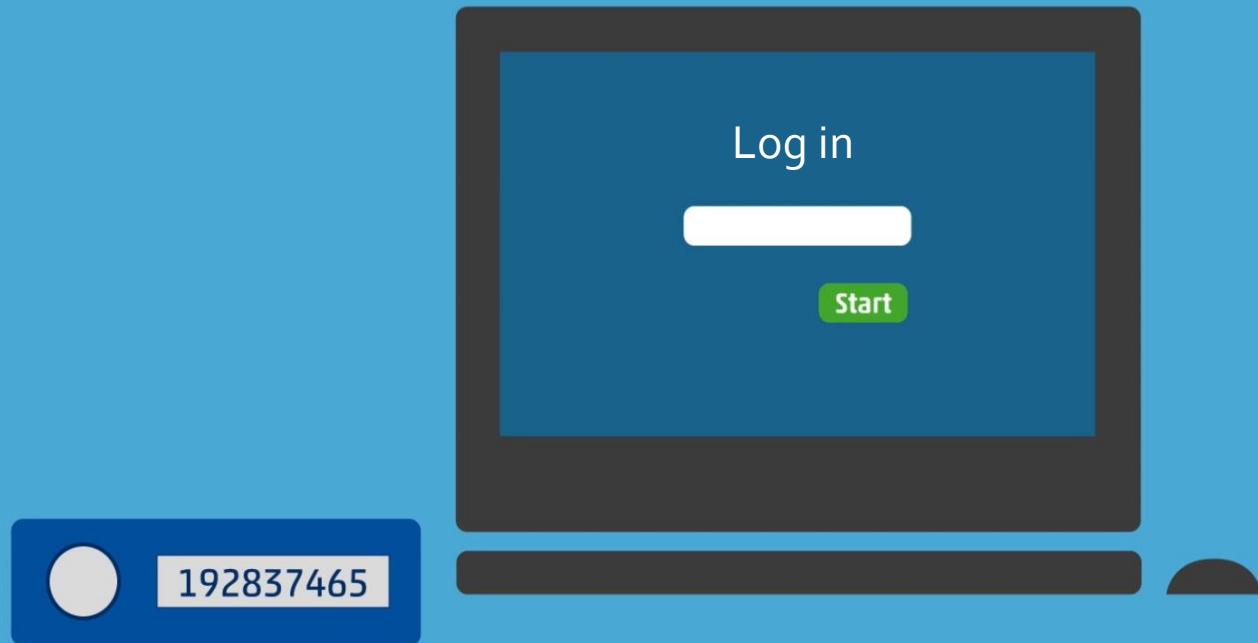

Phase 3:
Implementation
Apr-Dec 2017

- Install system all customers: token, SMS-code, VPN
- Return smartcards and fingerprint readers
- Destroy all fingerprints
- Dismantling old RA system

Remote Access new

10

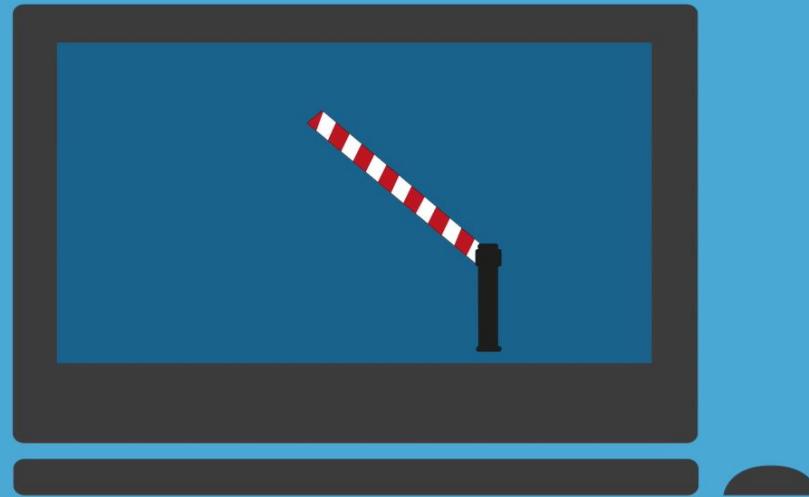

Remote Access new

Remote Access new

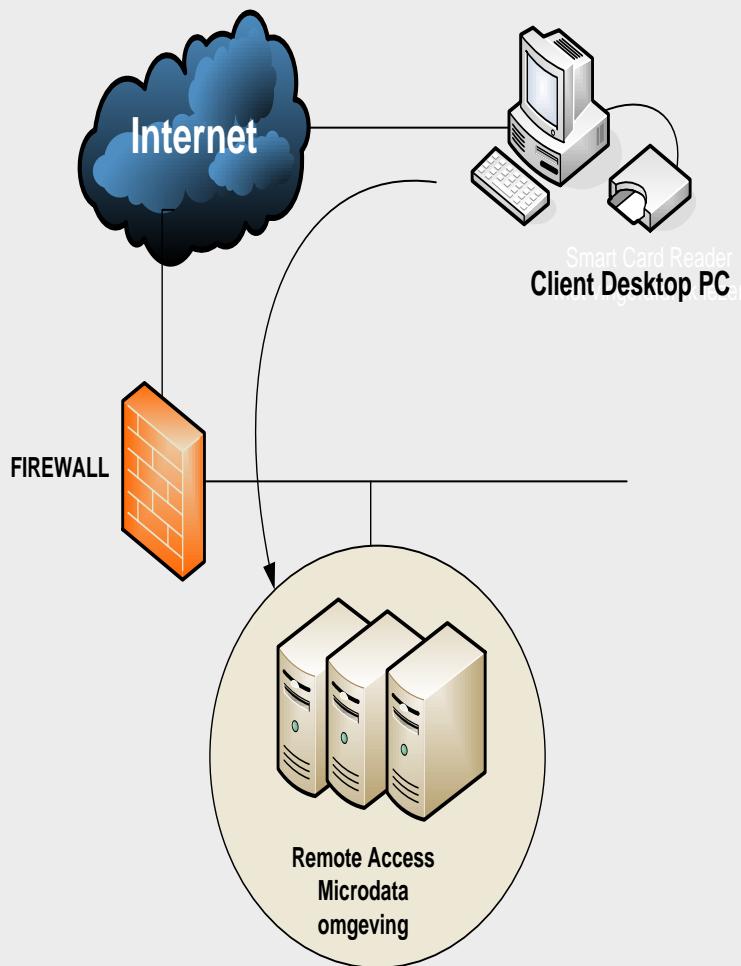

- Very flexible
- 2 factor authentication
- Lower costs
- Output faster
- Awareness privacy & measures

Questions?

Authentication now

Stap 1

Internet Explorer

Browser component voor uitlezen Smartcard (van Scard Soft)

Browser component voor biometrisch lezen van de vingers (van Bio-key)

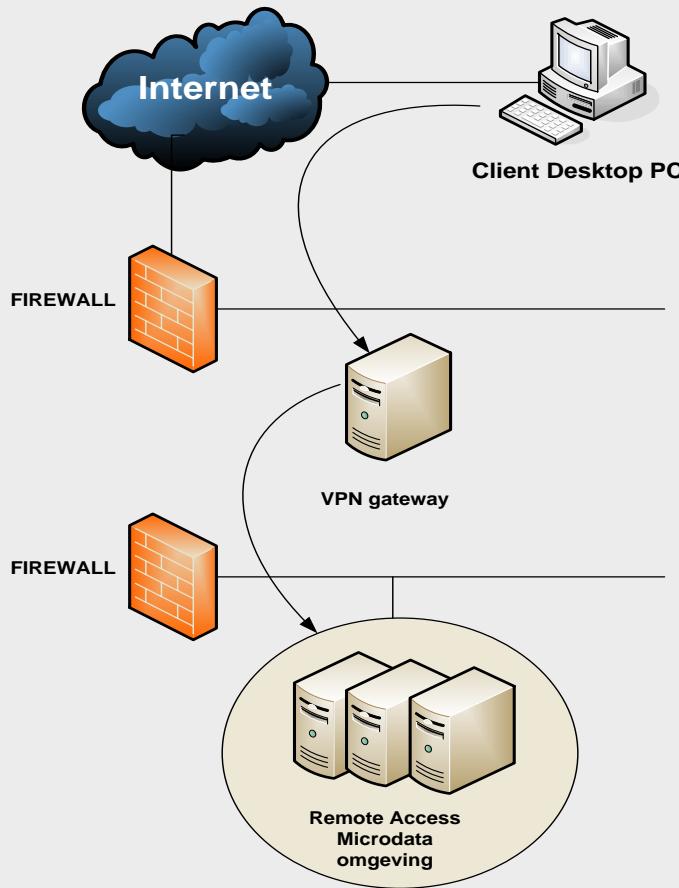

Inloggen via smartcard en vingerafdruk op het Remote Access Microdata webinterface

Stap 2

Starten van een Remote Access Microdata sessie na inloggen op het web interface

Authentication new

Stap 1

Internet Explorer / VPN client

Opzetten VPN middels
usernaam/wachtwoord +
hardware token

Stap 2

Internet Explorer

Inloggen op de Microdata
website middels usernaam/
wachtwoord + SMS token

Stap 3

Starten van een Remote
Access Microdata sessie na
inloggen op het web interface
