When using data and materials from this Statistical Book, please make sure you have made reference to the original publication.

You can buy copies of the Statistical Book “Economic Activity of Population in Ukraine” at:

State Enterprise “Information and Analytical Agency” (Derzhanalitinform) tel. 289-77-62;
287-03-79.

Foreword

This Statistical Book presents detailed statistics to describe the status of economic activity, employment and unemployment of population aged 15–70 years old on the labour market of Ukraine in 2011.

Indicators of economic activity, employment and unemployment have been obtained from materials of sample surveys of population (households) on economic activity issues (hereinafter – the “Surveys”).

The Book also provides data on main indicators of the registered labour market, which are based on administrative registers of the State Employment Service.

The Statistical Book describes methodological and organizational issues of surveys, provides necessary explanations for the methodology of determining main labour market indicators, and methods of selecting a sample of households and data reliability assessment. The information is arranged by topics in 7 relevant sections of the Book.

Sections 1–4 are dedicated to economically active, occupied and unemployed population as determined by the methodology of the International Labour Organisation (ILO).

Section 5 presents main indicators of population’s economic activity in dynamics for 2000–2011.

Section 6 compares indicators of employment, unemployment (according to the ILO methodology) in Ukraine with EU as well as with CIS countries on registered unemployment indicators.

Section 7 presents information on main indicators of the registered labour market (release of employees, labour force demand and supply, employment of unoccupied citizens, registered unemployment, etc.).

The publication also contains a brief analytical labour market review in 2011.

Some phenomena are illustrated in diagrams that give an idea of the main trends on the labour market of Ukraine.

We hope that the Statistical Book will be interesting to experts of the legislative and executive authorities, trade unions, scientific institutions and establishments, and other users dealing with issues of developing social policy and labour market problems.

To users

Indicators of sample surveys of population (households) on economic activity issues are referred to estimators that enable determining a level of reliability of data to be used.

Detailed methodological clarifications on data reliability are provided in the Sections “Principles of Sample Generation and Estimation of Indicators of Sample Surveys of Population (Households) on Economic Activity Issues”.

It should also be noted that some data of the statistical and analytical review have been revised against the earlier published versions.

Key Symbols Used in the Statistical Book:

— (dash)	- no phenomenon observed;
... (elision marks)	- missing data;
: (colon)	- data not provided because of high coefficient of variation;
0.0 (zero)	phenomenon existed but in smaller dimensions than those to be expressed in the table's digital positions;
X (eks symbol)	- no point in filling in the heading by type of phenomenon;
“of which“	- not all addends of the total sum presented;
“including”	- all addends of the total sum presented.

Notes

In some cases, insignificant discrepancies between the overalls and the total of adding items can be explained by data rounding.

Table of Contents

	Pages
Foreword	3
Legend symbols used in the Statistical Book	4
Notes	4
Methodological and Organizational Grounds for Sample Survey of Population (Households) regarding Their Economic Activity	12
Key Methodological Definitions and Concepts Used in the Statistical Book	14
Principles of Sample Generation and Estimation of Indices of Sample Surveys of Population (Households) regarding Their Economic Activity	20
Statistical and Analytical Review of the Labour Market Conditions in 2011	43
Section 1 Economic activity of population in 2011	
1.1. Economic activity of population by gender and location	52
1.2. Population aged 15-70 years old by economic activity, gender and location (diagram)	53
1.3. Rates of economic activity, employment and unemployment of population aged 15-70 years old (diagram)	53
1.4. Rates of economic activity of population aged 15-70 years old by location (diagram)	53
1.5. Economic activity of population by gender, location and age groups	54
1.6. Rates of economic activity of population by age groups (diagram)	57
1.7. Rates of employment of population by age groups (diagram)	57
1.8. Rates of unemployment of population by age groups (diagram)	57
1.9. Economic activity of population by gender, location and level of education	58
1.10. Rates of economic activity of population by level of education (diagram)	61
1.11. Rates of employment of population by level of education (diagram)	61
1.12. Rates of unemployment of population by level of education (diagram)	61
1.13. Economic activity of population by gender, location and regions	62
1.14. Economic activity of population of working age by gender, location and regions	65
1.15. Economic activity of population by level of education and regions	68
1.16. Economical inactivity of population by level of education and regions	69

Section 2 Employability of population in 2011

2.1.	Employability of population by gender, location and status in employment	72
2.2.	Employability of population aged 15-70 years old by status in employment (diagram)	73
2.3.	Employability of population aged 15-70 years old by gender and status in employment (diagram)	74
2.4.	Employability of population aged 15-70 years old by location and status in employment (diagram)	74
2.5.	Amount of occupied population by economic activities	75
2.6.	Amount of occupied population by economic activities and regions	76
2.7.	Employability of population by gender, location and occupational groups	78
2.8.	Employability of population aged 15-64 years old by gender, location and occupational groups	79
2.9.	Population involved in economic activity by gender, location and reasons of temporary absence from work	80
2.10.	Employability of population by gender, location and duration of the worked weekly hours	81
2.11.	Employability of population by gender, location and duration of hours worked per week	82
2.12.	Average duration of the actual hours worked per week by occupied population broken down by status in employment, gender and location	84
2.13.	Average duration of the actual hours worked per week by status in employment (diagram)	84
2.14.	Average duration of the actual hours worked per week by occupied population broken down by economic activities, gender and location	85
2.15.	Average duration of the actual hours worked per week by occupied population broken down by occupational groups, gender and location	86
2.16.	Population engaged in the informal sector by gender, location and status in employment	87
2.17.	Population engaged in the informal sector by gender, location and status in employment (diagram)	87
2.18.	Population engaged in the informal sector by gender, location and age groups	88
2.19.	Level of participation of population engaged in the informal sector by gender, location and age groups	88
2.20.	Population engaged in the informal sector by gender, location and level of education	89

2.21.	Level of participation of population engaged in the informal sector by gender, location and level of education	89
2.22.	Employability of population aged 15-70 years old in the informal sector by economic activities (diagram)	90
2.23.	Level of participation of population engaged in the informal sector by regions (diagram)	90
Section 3	Unemployment in 2011	
3.1.	Composition of unemployed population by gender and location broken down by quarters	92
3.2.	Unemployed population by reasons of unemployment, gender and location	93
3.3.	Unemployed population by trends of job hunt, gender and location	94
3.4.	Unemployed population by occupational groups, gender and location	95
3.5.	Unemployed population aged 15-70 years old by economic activities (diagram)	96
3.6.	Unemployed population by duration of unemployment, gender and location	97
3.7.	Unemployed population by duration of unemployment (diagram)	97
3.8.	Unemployed population by length of job hunt, gender and location	98
3.9.	Unemployed population by length of job hunt (diagram)	98
3.10.	Long-term unemployment rate in age of 15-70 years old in 2000-2011 (diagram)	99
3.11.	Long-term unemployment rate in age of 15-70 years old by gender in 2000-2011 (diagram)	99
3.12.	Average length of length of job hunt by unemployed by gender, location and regions	100
Section 4	Economically inactive population in 2011	
4.1.	Population by reasons of economic inactivity, gender and location	102
4.2.	Population by reasons of economic inactivity, gender, location and age groups	103
4.3.	Population by reasons of economic inactivity, gender, location and level of education	108
4.4.	Population by reasons of economic inactivity and regions	110
4.5.	Discouraged population of working age by gender, location	111

	and reasons of unemployment	
4.6.	Discouraged population of working age by gender, location and duration of unemployment	112
4.7.	Discouraged population of working age by gender and location (diagram)	113
4.8.	Discouraged population of working age by duration of unemployment (diagram)	113
Section 5	Key indices of economic activity of population in 2000 – 2011	
5.1.	Amount of economically active population by age groups, gender and location	116
5.2.	Rates of economic activity of population by age groups, gender and location	117
5.3.	Amount of occupied population by age groups, gender and location	118
5.4.	Rates of employment of population by age groups, gender and location	119
5.5.	Amount of unemployed population by age groups, gender and location	120
5.6.	Rate of unemployment of population by age groups, gender and location	121
5.7.	Amount of economically inactive population by age groups, gender and location	122
5.8.	Economic activity of population by gender, location and regions	123
5.9.	Employability of population by gender, location and regions	128
5.10.	Unemployment of population by gender, location and regions	133
5.11.	Economic inactivity of population by gender, location and regions	138
5.12.	Economic activity of population by gender, location and level of education	143
5.13.	Economic activity of population aged 15-64 years old by gender, location and level of education	144
5.14.	Employment of population by gender, location and level of education	145
5.15.	Employment of population aged 15-64 years old by gender, location and level of education	146
5.16.	Amount of occupied population by economic activities	147
5.17.	Population engaged in the informal sector by gender, location and status in employment	148
5.18.	Population engaged in the informal sector by status in employment (diagram)	149

5.19.	Occupation of population aged 15-70 years old in the informal sector by economic activities (diagram)	149
5.20.	Population engaged in the informal sector by gender, location and age groups	150
5.21.	Level of participation of population engaged in the informal sector by gender, location and age groups	151
5.22.	Population engaged in the informal sector by gender, location and level of education	152
5.23.	Level of participation of population engaged in the informal sector by gender, location and level of education	153
5.24.	Unemployment of population by gender, location and level of education	154
5.25.	Unemployment of population aged 15-64 years old by gender, location and level of education	155
5.26.	Unemployed population by economic activities	156
5.27.	Economic inactivity of population by gender, location and level of education	157
5.28.	Discouraged population of working age by gender and location	158

Section 6 International comparisons

6.1.	Rate of employment of Ukrainian and EU population by gender	160
6.2.	Rate of employment of population aged 15-64 years old in Ukraine and EU by gender	162
6.3.	Rate of employment of population aged 15-24 years old in Ukraine and EU by gender	164
6.4.	Rate of unemployment of Ukrainian and EU population by gender	166
6.5.	Rate of unemployment of Ukrainian and EU population (according to the ILO methodology) in 2011 (diagram)	168
6.6.	Rate of unemployment of Ukrainian and EU population aged 15-64 years old by gender	169
6.7.	Rate of unemployment of Ukrainian and EU population aged 15-24 years old by gender	171
6.8.	Rate of registered unemployment in CIS countries	173
6.9.	Rate of registered unemployment in 2010-2011 (diagram)	173

Section 7 Registered labour market

7.1.	Release of employees by gender, job categories and economic activities	176
7.2.	Release of employees by job categories in 2000-2011 (diagram)	177
7.3.	Release of employees by gender in 2000-2011 (diagram)	177

7.4.	Release of employees by economic activities in 2010-2011 (diagram)	177
7.5.	Release of employees by regions	178
7.6.	Labour force demand by job categories and economic activities	179
7.7.	Companies' demand for employees by job categories in 2010-2011 (diagram)	180
7.8.	Demand for employees in 2000-2011 (diagram)	180
7.9.	Companies' demand for employees by economic activities in 2010-2011 (diagram)	180
7.10.	Labour force demand by regions	181
7.11.	Load of unoccupied population per one vacant workplace (vacant position) by regions	182
7.12.	Demand and supply of labour force by occupational groups of employees	183
7.13.	Load of unoccupied population per one vacant workplace (vacant position) by occupational groups of employees	184
7.14.	Registered unemployed by gender in 2000-2011 (diagram)	185
7.15.	Registered unemployed by education in 2010-2011 (diagram)	185
7.16.	Registered unemployed by categories in 2010-2011 (diagram)	185
7.17.	Main reasons of unemployment among registered unemployed who have not worked up to 1 year in 2010-2011 (diagram)	185
7.18.	Registered unemployed by education, categories of employees and reasons of unemployment	186
7.19.	Registered unemployed by gender, location and regions	187
7.20.	Rate of registered unemployment by gender, location and regions	192
7.21.	Employment of unoccupied citizens by gender, categories of vacancies and economic activities	197
7.22.	Employment of unoccupied citizens by regions	198
7.23.	Rate of employment of unoccupied citizens by regions	199
7.24.	Duration of registered unemployment	200
7.25.	Duration of registered unemployment by regions in 2011	201
7.26.	Average duration of registered unemployment	202
7.27.	Unemployment benefits by regions	203
7.28.	Registered unemployment by amounts of unemployment benefits in 2011 (without indexation)	204
7.29.	Registered unemployed by age groups, gender and regions in 2011	205
