

## Agenda

- Short presentation of Statistics Denmark
- A few points related to survey sampling
  - Frames for different kinds of surveys
  - Coordination of samples
  - Software
  - Organization / Workflow

## Statistics Denmark

## Independent

- Professional independence
- Objective and impartial

*We have to secure the status of Statistics Denmark as the central, independent provider of official Danish statistics.*

— Jørgen Elmeskov, June 2013

## National Statistician

### Jørgen Elmeskov

National Statistician  
from October, 2013

Former Director and  
Deputy Chief Economist  
at the OECD

Master in Economics  
From the University of Copenhagen

Born 1956

## Mission and Vision

### Mission:

- Statistics Denmark produces impartial statistics on society as the basis for democracy and the national economy

### Vision with four elements:

- user-friendly & data supplier-friendly
- effective and innovative
- integrate the official statistics
- attractive workplace

## Subjects

Social statistics	Business statistics	Economic statistics
<ul style="list-style-type: none"> <li>• Population &amp; Elections</li> <li>• Living Conditions</li> <li>• Education &amp; Knowledge</li> <li>• National Church</li> <li>• Labor, Earnings &amp; Income</li> </ul>	<ul style="list-style-type: none"> <li>• Business Sector in General</li> <li>• Business Sectors</li> <li>• Geography, Environment &amp; Energy</li> <li>• Culture</li> </ul>	<ul style="list-style-type: none"> <li>• Prices and Consumption</li> <li>• National Accounts &amp; Government Finances</li> <li>• Money &amp; Finance Market</li> <li>• External Economy</li> </ul>

**Statbank**

Billions of numbers  
 3,000 tables  
 Updated daily at 9:00 a.m.  
[www.statbank.dk](http://www.statbank.dk)

- ### Division of Research and Methods
- Research Services, 14 employees
  - Statistical Methodology, 7 employees
  - Metadata and Quality, 4 employees
  - Statistical Methodology employees have background in statistics (2), mathematics, economy, physics, engineering, and forest science (me)
  - Statistical Methodology performs consulting on
    - Samples and estimation
    - Editing and imputation
    - Seasonal adjustment
    - Ad hoc statistical analysis

### Staffing and budget

Employees: 562 man-years  
 Budget: DKK 384 m. Euro 51.5 m.  
 Of this own income: DKK 114 m. Euro 15.3 m.  
 All numbers of 2013

### Historical and legal background

- 1849:** Democracy in Denmark
- 1850:** Establishment of Statistics Denmark
- 1966:** Act on Statistics Denmark
- 1994:** UN fundamental principles of official statistics
- 2001:** Free access to the Statbank
- 2005:** European Statistics Code of Practice
- 2009:** Strategy 2015

## More statistics

## Detailed agenda

- Frames for different kinds of surveys
  - Statistical business register
  - Central personal register
- Coordination of samples
- Software - SAS / CLAN
- Organization of work – GSBPM

## Detailed agenda

- Frames for different kinds of surveys
  - Statistical business register
  - Central personal register
- Coordination of samples
- Software - SAS / CLAN
- Organization of work – GSBPM

## Sources for sampling frames 1

- The Statistical Business Register (SBR) is a statistical register maintained by Statistics Denmark
  - <http://www.dst.dk/en/Statistik/dokumentation/Declarations/th-e-statistical-business-register.aspx>
- Danish Business Authority maintain the Central Business Register (CVR) – this is an administrative register
  - We get daily updates from CVR that are fed into SBR including information about address and NACE classification

## Sources for sampling frames 2

- The SBR is supplemented with information from SKAT (Danish tax authorities), namely turn-over and number of employees (eIncome)
- The update is quite fast but not real-time
  - There might be a slight over-coverage...

## Sources for sampling frames 3

- For agricultural statistics we can rely on supplemental information from the Central Register for Domestic Animals and the Danish Veterinary

- ... and applications for farm subsidies

## Sources for sampling frames 4

- The Central Personal Register is a register of Personal Identification Numbers
- Merged with other official registers so that we have Marital status, income, education, ethnicity...
- Danish citizens much be in CPR, but what about
  - Homeless
  - Guest workers (not immigrant or refugees)
  - Immigrant waiting for asylum in camps...
  - Danish citizens staying abroad

## Non-eligible persons...

## 788.000 danskere afviser forskere

**Kvaliteten af samfundsforskeren er i fare, fordi mange har sagt nej til at blive kontaktede. Minister vil nu ændre loven.**

**FORSKNING**

Hver tredje dansker har sagt nej til at blive kontaktet af forskere, og det kan være en alvorlig trussel mod kvaliteten af den danske forskning, mener statsminister Lars Løkke Rasmussen. Han vil derfor ændre loven om samfundsforskning, så forskere kan kontakte flere danskere.

Statsministeren har sagt, at det er vigtigt at have en bred base af respondenter til de undersøgelser, som forskere laver. Han har sagt, at det er vigtigt at have en bred base af respondenter, så forskere kan lave gode undersøgelser.

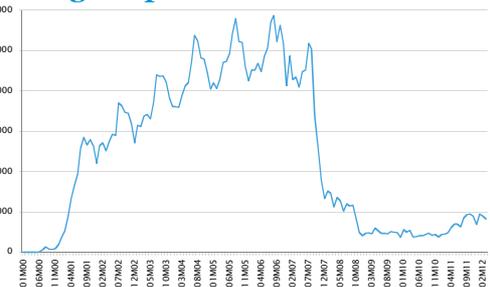

Statsministeren har sagt, at det er vigtigt at have en bred base af respondenter, så forskere kan lave gode undersøgelser. Han har sagt, at det er vigtigt at have en bred base af respondenter, så forskere kan lave gode undersøgelser.

**POLITIKENS MÆRKE**

### Løse kanoner

Følgende kanoner er blevet fundet i forbindelse med en undersøgelse af den danske politik. De er blevet fundet i forbindelse med en undersøgelse af den danske politik.

## Monthly growth in numbers of non-eligible persons

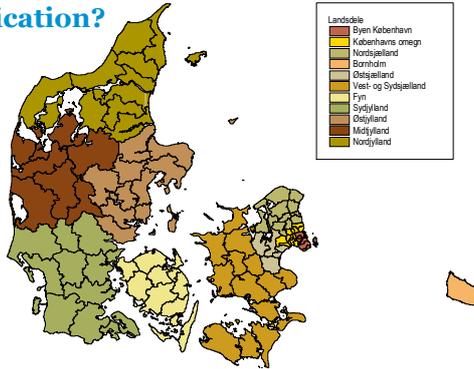

## Age distribution on non-eligible

Age group	Eligible	Non-eligible	Total	Non-eligible (percent)
-14	890.734	93.144	983.878	9,5
15-17	189.486	26.220	215.706	12,2
18-24	432.274	61.727	494.001	12,5
25-34	477.251	171.795	649.046	26,5
35-44	616.195	154.195	770.390	20,0
45-54	697.762	97.285	795.047	12,2
55-64	644.535	55.461	699.996	7,9
65-74	542.247	35.410	577.657	6,1
75+	380.206	18.831	399.037	4,7
Total	4.870.690	714.068	5.584.758	12,8

## Typical sampling fraction

- Labour Force Survey (LFS); quarterly
  - $N = 4.500.000$
  - $n = 35.000$
  - $f = 0,78$  percent
- Research and Development Survey; yearly
  - $N = 18.000$
  - $n = 4.000$
  - $f = 22$  percent

## Stratification?

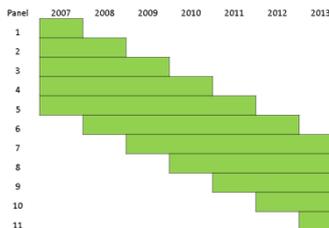

## Detailed agenda

- Frames for different kinds of surveys
  - Statistical business register
  - Central personal register
- Coordination of samples
- Software - SAS / CLAN
- Organization of work – GSBPM

## Rotating panel

- Controlled overlap between samples...

## Principles in a rotating panel

- With a 5-wave panel the selected units stay in the sample for five years – then they are "released"
- Ideally, this corresponds to 80 percent overlap and 20 percent replacement
- However, this demands a fixed population and that the same allocation is used time after time (and that none of the newly released units are selected again)

## Advantages with a rotating panel

- The selected businesses learn to fill in the questionnaire fast and correctly
  - Reduced burden with one units participating five times compared to five units participating a single time
  - Perhaps smaller measurement error
- Smaller error on the change  $\Delta_t = y_t - y_{t-1}$  due to the positive correlation between answers in the two surveys
  - However, this reduction can be hard to quantify...

## The "only 3" rule

- Businesses with less than 10 employees can only be selected for three different mandatory surveys

## Detailed agenda

- Frames for different kinds of surveys
  - Statistical business register
  - Central personal register
- Coordination of samples
- Software - SAS / CLAN
- Organization of work – GSBPM

## Software for calibration and estimation of standard error

- SAS
  - proc surveystest
  - proc surveymeans
  - CLAN
- R
  - Survey-package (Thomas Lumley)

## Analyses of non-response

Uddannelsesgruppe	Udtrukket til stikprøven?			Respondent?		
	Nej	Ja	I alt	Nej	Ja	I alt
1. Folkeskole el.lign.	69.423	1227	70.650	359	868	1227
	98,26	1,74		29,26	70,74	
2. Gymnasial	14.097	235	14.332	88	147	235
	98,36	1,64		37,45	62,55	
3. Erhverv og korte videregående	68.744	1172	69.916	275	897	1172
	98,32	1,68		23,46	76,54	
4. Mellemlang videregående	22.352	390	22.742	67	323	390
	98,29	1,71		17,18	82,82	
5. Længere videregående	14.019	247	14.266	60	187	247
	98,27	1,73		24,29	75,71	
6. Ingen uddannelse eller uoplyst	11.365	205	11.570	104	101	205
	98,23	1,77		50,73	49,27	
Total	200.000	3476	203.476	953	2523	3476

## Detailed agenda

- Frames for different kinds of surveys
  - Statistical business register
  - Central personal register
- Coordination of samples
- Software - SAS / CLAN
- Organization of work – GSBPM

## Work flow according to GSBPM

- Generic Statistical Business Process Model is joint UNECE / Eurostat / OECD Work
- Intention: To provide a basis for statistical organizations to agree on standard terminology to aid their discussions on developing statistical metadata systems and processes.
