

FortiToken setup guide for android users

To follow this guide you need to have received a FortiToken activation code via mail.
Contact servicedesk@dst.dk if you have not received one.

Install the app

1. Open Google Play  on your phone and search for **"FortiToken Mobile"**

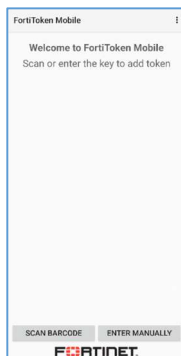

Install the app

2. Open the app when the installation is finished
3. Allow the app to have access to your camera and to send notifications

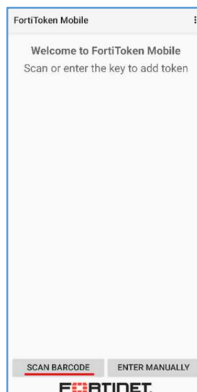

4. The app is now ready for the Token

Setup with QR code

1. In the app click on "Scan Barcode"

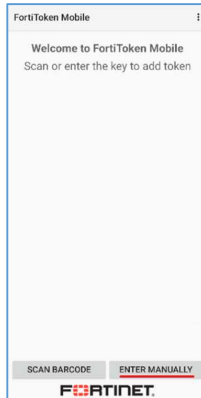

2. Scan the attached QR code from the email you have received
3. A token code will appear in your app

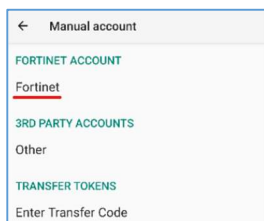

Manual setup

If the QR code won't scan you can enter the activation key manually into the app

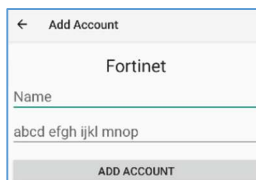

1. Open **FortiToken** and click **Enter Manually**

2. Select **Fortinet**

3. Enter a fitting name for your token (ex. DST or your ident) as **Name**
Enter the activation code underneath. Then click **ADD ACCOUNT**

4. The Token will then appear in your app.

The Token is now ready to use for signing in to remote.dst.dk
