

# Population and elections

## Population and elections

### 1. Danish population trends

#### Population size

Since the mid-1970s, Denmark has had a population of approximately five million inhabitants. The size of the population has seen a slow but steady increase since 1970. However, during the early 1980s the population fell - partly due to reductions in the number of births.

Population developments depend on four component elements: the number of live births, the number of deaths, immigration, and emigration (external migration). Figure 1 shows how the population increase during recent years is the result of two things: positive natural increase (births ÷ deaths) and positive net migration (immigration ÷ emigration). Positive net migration means that more people enter this country than leave it.

Figure 1

Population trends 1970-2000

#### Women are in majority

Even though more boys than girls are born every year, women comprise slightly more than half of the Danish population (50.6 per cent). This is because of higher mortality rates among men. There are more men than women in all age groups up to and including 58 years, but women take over in all subsequent age groups. The 95 and over age group comprises almost four times as many women as men.

#### Population age

The Danish population is getting older. The average age in Denmark is 39.2 years as of 1 January 2001. For men, this figure is 38.0 years, whereas the corresponding figure for women is 40.4 years. When examining 1980 figures, the average age was more than two years lower (an overall average age of 36.7 years; 35.5 years for men, 38.0 years for women). This increase in the average age is partly caused by an increase in the number of people over the age of 80. It is, however, also occasioned by the fact that the large generations from the mid-1940s have now reached their fifties, as well as the fact that the large generations from the mid-1960s are now being classified to an older age group and are replaced by smaller generations.

# Population and Elections

Figure 2

The Danish population, 1 January 2001

## Where do the elderly live?

There are vast differences to population distributions by age amongst the various municipalities. For example, the percentage of over-65s in some municipalities is only between 5 and 10 per cent, whereas other municipalities have populations where more than 20 per cent are over 65 years old. This is especially true for the smaller Danish islands.

Figur 3

Percentage of persons over 65, by municipalities, 1 January 2001

# Population and elections

---

## 2. The demographic dependency ratio in Denmark

### How many individuals will need support in future?

The demographic dependency ratio is calculated on the basis of the population distribution by age. Dependency ratio shows the relationship between the number of persons outside the economically active population and the number of persons available to support them.

If the economically active (working) population is calculated as those within the 20 - 59 age group, the dependency ratio is 0.77. That is to say that for every 100 economically active individuals, 77 persons need support. On the basis of the most recent forecasts on population development, the demographic dependency ratio will increase to 0.91 in 2010 and reach 1.0 in 2030. In 1960, The demographic dependency ratio was 0.79. This is to say that more and more people will need support in the years to come, a development which is linked to the fact that the number of elderly people will continue to increase in future.

### The demographic dependency ratio in the EU

It is possible to compare the dependency ratio for the Member State of the EU for 1996. Here, the economically active population has also been defined as the 20-59 age group. These figures show that Denmark has the lowest demographic dependency ratio within the EU at 0.65. the average for the EU is 0.8. Ireland has the greatest demographic dependency ratio at 0.95, followed by Sweden at 0.87. As regards Ireland, this figure means that the number of people who need support and the economically active population almost match each other one to one.

## 3. Births

### How many children are born each year?

During recent years, the number of live births has been approximately 67,000 a year. The number of births during a given period depends on the number of women of childbearing age and on the number of children born to each woman. The *total fertility rate*, i.e. the average number of live births per woman, is 1.7 in Denmark.

With 1.7 children per woman, Denmark has one of the highest fertility rates in the EU. In 1999, the only countries with higher fertility rates were Ireland (1.9) and Finland (1.8), while Italy and Spain had the lowest fertility rates (1.2 for both countries).

### Older mothers

Over the years, women have become increasingly mature before becoming mothers. In 2000, the average age of women giving birth for the first time was 29.7 years. This development has been especially pronounced since 1970, when the total average age of women giving birth was 26.7 years.

# Population and elections

## 4. Families

### Postponed marriages

The way in which Danes form families has changed during the last 30 years. The forms of partnership have changed; but marriage is still the dominant form of partnership. 78 per cent of all couples living together are married. However, this percentage is decreasing, especially among the younger generations. In 1970, 88 per cent of all 30 year-old women were married. In 2001, the corresponding figure is only 49 per cent for all 30 year-old women. Simultaneously, the average age of women when they first get married has increased from 22.8 years to 30.1 years and from 25.1 years to 32.6 years for men.

### We still live as couples

The fact that people get older before they get married does not mean that they do not live as couples. It does, however, mean that it becomes increasingly common for couples to live together without being married. This is especially true of the younger generations.

### Fewer singles

After a long period with an increasing number of singles, the last couple of years have seen a slight decrease in the number of single-person households. However, more than one third of all adults live alone, and women comprise the majority of this group (53 per cent). Of those individuals with no partner, 61 per cent of the women and approximately 55 per cent of the male population live completely alone. The rest live with other persons, who - depending on the age of the person in question - are often parents or children.

Figure 4

Development in adult family types, 1 January 1980-2000

### Young men and older women live alone

When considering the younger generations, more young men than women live alone. This is due to several factors. First of all, single women live with children to a greater degree than single men. Secondly, men tend to be a couple of years older than women when entering a relationship. In addition to this, the younger age groups number more men than women. Conversely, among the older generations it is much more common for women to live alone than for men. This is caused by the fact that women outnumber the men in this age group, quite simply because the men die sooner.

### More marriage end in divorce

A little more than 18 per cent of all marriages entered into in 1950 had been dissolved by divorce after a period of 25 years. The same held true for 37 per cent of the marriages entered into in 1975. Thus, there is an increase in the number of marriages which end in divorce. At present, it would appear that the tide is turning for those marriages which were entered into in 1990 or later. As yet, these marriages have lower

## Population and elections

divorce rates than the 1985 marriages. The percentage of marriages entered into in 1985 which remain after 5 years, was approximately 85 per cent, while the corresponding percentage was 89 per cent for marriages entered into in 1995.

Figure 5

The percentage of marriages entered into in 1950-1995 which remain after 5-25 years

## 5. Mortality

### Most of us live past 60

In recent years, the number of deaths in Denmark has been approximately 60,000 deaths a year. Most people die after having passed the age of 60. In 2000, more than 85 per cent of all deaths occurred in the over-60 age group.

More men than women die within practically all age groups. This is to say that there is an excess mortality for men in relation to women. The infant mortality rate is one-third greater for boys than for girls. An even greater difference is evident in the 15-35 age group, where the mortality rate for men is up to two or three times greater than that for women.

### Life expectancy reflects the health of a population

Life expectancy is one of the most commonly used statistics for assessing the health of a population. Life expectancy is the average number of years that a person can expect to live, based on the latest figures for mortality. The latest life-expectancy rates have been calculated at 74.3 for men and 79.0 for women.

Figure 6

Life expectancy rates in selected countries, 1998

Source: Eurostat: European Social Statistics Demography

## Population and elections

### Higher life expectancy rates

The trend as regards life expectancy has not been as positive in Denmark as it has in many other countries. The trend towards stagnation in life expectancy is especially pronounced among Danish women. In the 1960s, Denmark had some of the highest life expectancy rates in the world, but later on Danish life expectancy rates were among the lowest in Western Europe. However, life expectancy rates have again increased during recent years. A comparison of mortality figures for 1995/96 and 1999/2000, shows a higher life expectancy rate of 1.6 year for men and 1.1 year for women.

### One quarter of all deaths are caused by cancer

Cancer, heart diseases and cardio-vascular disorders are the three main causes of death. Almost two thirds of all deaths are caused by one of these conditions. The number of deaths from heart disease has fallen in recent years, whereas the number of deaths by cancer shows the opposite tendency.

### Fewer suicides

The number of suicides has been decreasing for some years, and the latest figures show 817 suicides in 1997, corresponding to approximately 1.4 per cent of all deaths. Suicide is more than twice as common among men as among women.

Figure 7

Number of suicides, 1970-1997

## 6. Internal and external migration

### One in six people move each year

Each year, more than 858,000 internal migrations are registered. This corresponds to one in six people moving each year. However, more than 100,000 people move twice or more within the span of a year. Almost two thirds of registered migrations are migrations within a single municipality.

### Immigration and emigration (external migration)

Denmark has more immigrants than emigrants. The level of immigration is, however, relatively low when compared to immigration statistics for countries such as Sweden and Germany. Immigration is often thought of as immigration of foreign citizens, but Danes can also be immigrating. Approximately half of all immigrants are Danish citizens returning after a shorter or longer period abroad.

# Population and elections

## More immigrants from remote countries

Previously, foreign citizens who migrated to Denmark came mainly from the other Nordic countries, the EU countries or the USA, and to some extent from Turkey and the former Yugoslavia. During the 1980s and 1990s, a large proportion of all immigrants continued to come from these countries; a new trend did, however, emerge: an increase in immigration from Asian countries such as Sri Lanka, Iran, and Iraq as well as African countries such as Somalia and Ethiopia. These groups consist mainly of refugees (and their families) who have been granted Danish residence permits.

Figure 8

Immigration and emigration 1970-2000

## The Danes emigrate - and then come back

When studying the Danish emigration statistics, it appears than the majority of emigrants - approximately two-thirds - are Danish citizens. These are usually individuals who go abroad for a period of time to study or work. Thus, most of these people will subsequently appear in the statistics as immigrants.

## Immigrants and descendants

Immigrants and descendants comprise 7.4 per cent of the total Danish population - 5.8 per cent are immigrants and 1.6 per cent are descendants. More than half of all immigrants and descendants originated in a European country. The majority originated in Turkey, the former Yugoslavia, or Germany. However, a substantial number come from Lebanon, Pakistan, Iran, Iraq, and Somalia.

## Concentration in and around the larger cities

Immigrants and descendants are not evenly distributed throughout Denmark. The immigrants and descendants from less developed countries are mainly found in and around the larger cities, particularly in the Greater Copenhagen area. For example, Ishøj, a suburb of Copenhagen, is home to a percentage of immigrants and descendants from less developed countries five times greater than the national average. Immigrants and descendants from developed countries are more evenly distributed across Denmark.

## Population and elections

© Kort- og Matrikelstyrelsen (G. 5-00)

### Definitions

In order to facilitate studies of the part of the Danish population with an immigrant background - including those who have now assumed Danish citizenship - the statistical concepts *immigrants* and *descendants* have been created. Immigrants are defined as persons who were born outside Denmark and whose parents are both foreign citizens or were born outside Denmark. Descendants are defined as persons born in Denmark to parents who are not Danish citizens born in Denmark.

## 7. Elections

### Election types

Statistics are published on a number of different election types; general elections (to the Folketing), elections to county councils, elections to municipality councils, elections to the European Parliament, and elections to local church councils. Statistics on referendums are also available.

### Elections to the Folketing (general elections)

Elections to the Folketing (the Danish parliament) are held once every four years; elections may, however, be called more frequently. General elections take place at the same time in Denmark, on the Faroe Islands and in Greenland. A total of 175 members of parliament are elected in Denmark, two members are elected on the Faroe Islands, and two members are elected in Greenland.

12 general elections have been held since 1970. Five general elections were held during the 1970s, one every other year. Four elections were held during the 1980s, and the 1990s saw three elections - in 1990, 1994, and 1998.

# Population and elections

## Electoral turnout

At the first four elections in the 1970s, more than 87 per cent of the electorate exercised their right to vote. Subsequent elections have attracted fluctuating electoral turnouts, with the minimum rate being 82.8 per cent in 1990. The latest general election attracted 86.0 per cent of all voters.

Figure 10

Electoral turnout for elections to the Folketing

## Parties nominated and elected

At the latest election to the Folketing, eleven parties were nominated, of which ten entered the Folketing. In 1987, 16 parties were nominated, of which only 9 entered the Folketing.

## Candidates nominated and elected

In 1998, 66 of the 175 members of parliament were women. This means that approximately 38 per cent of all members of parliament are women, which is the highest rate so far. In the 1970s, the proportion of women in the Folketing was less than 20 per cent.

Figure 11

Distribution of seats after the 1998 election to the Folketing

## Elections to county councils

Elections to county councils are held once every four years. The last election was in 1997. The electoral turnout for elections to county councils is usually significantly lower than the electoral turnout for general elections. At the latest election to county councils, the average electoral turnout for all of Denmark was 71.4 per cent. The highest electoral turnout was in the county of Bornholm (77.4 per cent), while the lowest was in the county of Nordjylland (68.4 per cent).

## Population and elections

---

Ten parties were nominated for all county councils, of which only three entered the county council in all counties.

The proportion of women elected in the most recent election to county councils was 29 per cent.

### **Elections to municipality councils**

Elections to municipality councils are held once every four years simultaneously with the elections to county councils. The latest election was held in 1997. As was true for elections to county councils, elections to municipality councils attract fewer voters than general elections. At the latest election to municipality councils, the voter turnout was 70.1 per cent.

A total of 17,373 candidates were nominated for the most recent election to municipality councils. Of these, 4,685 were elected. Women candidates comprised 27 per cent of those elected.

### **Elections to local church councils**

Elections to local church councils are held once every four years. The most recent election was in 2000. However, not all districts hold an election. At the latest election in 1996, only 331 of the 2,219 local church districts held an election.

### **Elections to the European Parliament**

Elections to the European Parliament are held once every five years. The latest election was held in 1999. Denmark elects 16 MEPs.

Elections to the European Parliament attract fewer voters than national elections. At the latest election, the electoral turnout was 50.5 per cent.

Eleven parties were nominated at the 1999 election, 8 of which entered the European Parliament. Women accounted for 37 per cent of the candidates elected.

### **Referendums**

Since 1920, 14 referendums and two consultative referendum have been held.

Three of these referendums have involved constitutional amendments (in 1920, 1939, and 1953), and five have concerned the voting age (in 1953, 1961, 1969, 1971, and 1978). Four referendums and one consultative referendum have addressed Denmark's relationship with the EEC/EU (in 1972, 1992, 1993, 1998 and 2000). One referendum, in 1963, concerned acquisition of farms and conservation of nature.

Electoral turnout for referendums has varied a great deal. The 1972 referendum on Danish accession to the EEC attracted the largest number of voters (90.1 per cent of the total voting population).

Self-employed in wholesale, retail trade, services	89 845	2 331	108	38 113	541	114
Of whom: General practitioners	2 446	50	73	...	...	...
Hotels and restaurants	5 245	177	159	4 229	76	144
Assisting spouses	...	...	...	37 901	596	79
Of whom: Agriculture etc.	...	...	...	18 276	259	65
Hotels and restaurants	...	...	...	1 117	17	110
Salaried employees at upper levels	178 745	3 057	75	53 679	528	100
Of whom: Teachers at instit. of higher education	17 697	287	61	7 514	83	87
Pilot, captain, navigator	3 954	91	92	...	...	...
Salaried employees at managerial levels	175 872	3 581	92	187 866	1 644	88
Of whom: Teachers	38 705	589	74	48 276	453	81
Supervisors, foremen	22 444	621	101	3 034	50	133
Other salaried employees	212 376	3 380	106	472 294	4 389	99
Of whom: Bank clerks, etc.	5 950	32	65	18 916	112	78
Nurses, assistant nurses, etc.	10 531	255	149	77 026	693	96
Skilled manual workers	266 315	4 249	101	26 185	178	109
Of whom: Manufacture of wood products	9 978	155	71	...	...	...
Hotels and restaurants	8 554	180	181	8 412	80	158
Unskilled manual workers	285 355	6 190	125	321 223	3 808	109
Of whom: Agriculture and horticulture	17 189	333	83	3 079	21	84
Hotels and restaurants	3 522	77	182	91 527	1 243	108
Employees not further specified	50 111	647	187	57 268	708	105

Note. The table includes persons aged 20-64 on 1.1.1991. Mortality was observed in the period 1.1.1991 up to and including 31.12.1995. The mortality index measures mortality in an occupation in relation to the total number of men and women in the occupation. Calculations take account of the differences in age distribution between occupations.

Note: Convention refugees must meet all conditions listed in the UN Refugee Convention regarding when a person is a refugee. De facto refugees do not meet the conditions listed in the UN Refugee Convention, however they can be granted asylum in accordance with Danish regulations regarding "other or exceptional reasons". Quota refugees are invited to Denmark via an agreement with the UNHCR.

20 years +	212	14	-	226	9	-	9	235

Note: Family adoptions are where one spouse adopts the other spouse's child.

**Table 70****Population projections for Denmark. Changes**

	2001-2009	2010-2019	2020-2029	2030-2039
annual average for the period				
Live births	65 256	64 036	72 204	73 452
Deaths	59 374	60 580	64 790	69 576
Net migration	13 978	17 762	18 000	18 000
Population growth	19 860	21 219	25 414	21 876
Percentage population growth	0.37	0.38	0.43	0.36

Note. The forecast is based on the following assumptions: Total fertility rate will increase to 1.8 in 2001 and further to 1.9 in year 2015 onwards. Mortality is based on the life table for 1998-99 with a life expectancy for men and women of 74.03 years and 78.80 years respectively. Life expectancy will gradually increase until 2039 ending at 79 years for men and 83 years for women. Net annual immigration will increase to 18,000 in 2015 and onwards throughout the forecast period.

Jutland	1 845 658	1 388 100	26 288	75.2	57.0	43.0	2	31.7

Note. For an *amendment to the constitution*. Referendums on the Constitution, which include the Faroes, are held according to section 93 of the Constitution of 5 June 1915 - section 94 as amended on 10 Sept. 1920. If a proposal is to be adopted it requires a majority of votes for, and at least 45 per cent of the electorate. In the 1939 referendum, the proposal was rejected. In the Constitution from 5 June 1953, the above majority was reduced to 40 pct. (section 88), Greenland became part of the Realm and women received the right to inherit the throne.

Note. For *voting age*. The voting age for the Folketing was reduced in the Constitution of 5 June 1915 from 30 to 25, but after with a transitional provision of 29 years for the next election (22 April 1918), and after this 1 year for every 4 years. The amendment to the constitution in 1920 cancelled this gradual reduction in the voting age. The 1953 referendum on reduction of the voting age to 23 or 21 was carried out in accordance with Act no. 50 of 25 March 1953 and held at the same time as the Constitution referendum; columns 6 and 7 for this line should read 'for 23 years' and 'for 21 years' respectively. For the referendum on voting age, 21-24 year-olds had voting rights and the referendum included the Faroe Islands. The following 4 referendums, which included the Faroe Islands and Greenland, were held in accordance with section 29 of the Constitution of 5 June 1953: the voting age can be changed by an Act, but a Bill adopted by the Folketing must be subjected to a referendum according to section 42 (5). Under section 42(5) if there is a 'yes' or 'no' to the Bill, the majority of 'no' votes must represent at least 30 pct. of the total electorate. In the 1969 referendum, the Bill was rejected.

Note. For *other issues*: Referendums are held according to the Constitution of 6 June 1953, the 1963 referendum in accordance with section 42(1) and 1972 and 1992 referendums in accordance with section 20. According to section 42(1), when a Bill has been adopted by the Folketing (and it is not exceptions-listed) one-third of the members of the Folketing within a time limit of three days, may request that the Bill be sent to a referendum. If the Bill is accepted, it is sent to referendum under section 42(5). According to section 20, authority which according to the Constitution belongs to the realm, may be left to international authorities if the Bill is adopted by five-sixths of the members of the Folketing. If the Bill has only a simple majority, it may be sent for approval or rejection by the electorate under section 42(5) (c.f. note to b). In the 1963 referendum, which only covered Denmark, all 4 Bills were rejected. In the 1972 referendum, which included the Faroe Islands and Greenland, the Bill was approved. In the 1992 referendum, which did not include the Faroe Islands and Greenland, the Bill was rejected. In the 1993 referendum, which did not include the Faroe Islands and Greenland, the Bill was approved. In the 1998 referendum, which did not include the Faroe Islands and Greenland, the Bill was approved.

Note. For *consultative referendums*. The sale of the West Indian Islands was sent to referendum under Act no. 204 and 336 of 30 September and 10 November respectively, 1916. According to the referendum, ratification of the agreement should be submitted to the Rigsdag for free negotiation unless the referendum resulted in a majority against the sale, in which case it would be cancelled. The referendum applied the extended voting rights terms under the Constitution and the Elections Act of 1015 (which first entered into force in spring 1918), whereby voting rights were granted to women, 29 year-olds, and persons in private service without their own address. The electorate (incl. the Faroe Islands) thus increased compared with the election to the Folketing on 7 May 1915 to 22 April 1918 from 508,787 to 1,226,650. The electorate in the 1916 referendum is not known precisely, but is estimated at 1,200,000 incl. the Faroes. The 1986 referendum was held according to the Act of 5 February 1986.

<sup>1</sup> Columns 6 and 7 in this line should read »for 23 years« and »for 21 years« respectively. <sup>2</sup> The percentage is not relevant.
